TWENTY-FIFTH

ANNUAL REPORT

—:OF THE:—

State Board of Education,

SHOWING THE CONDITION OF THE

PUBLIC SCHOOLS OF MARYLAND,

—:FOR THE:—

Year Ending July 31st, 1891.

ANNAPOLIS, MD.:
C. H. BAUGHMAN & CO., STATE PRINTERS.
1892.

STATE OF MARYLAND,

OFFICE OF THE STATE BOARD OF EDUCATION.

BALTIMORE, December, 17, 1891.

To His Excellency, ELIHU E. JACKSON,
Governor of Maryland:

Sir: I have the honor to transmit to you the Annual Report of the State Board of Education, for the fiscal and school year ending July 31st, 1891, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

E. B. PRETTYMAN,
Secretary.

REPORT

OF THE

State Board of Education.

The following summary, in connection with the accompanying tables, exhibits in a condensed form the most important facts connected with the administration of the public school system of the State, for the fiscal and school year, ending in the city of Baltimore, December 31, 1890, and in the counties, July 31, 1891.

The several items are compared with the corresponding items for 1889, in the city of Baltimore, and for 1890 in the counties :

Number of schools in Baltimore City.....	147	
" " " " the Counties.....	2,089	
Total.....		2,236
Being an increase in 1891 of.....47		
Number of different pupils, City.....	65,758	
" " " " Counties.....	123,456	
Total.....		189,214
Being an increase in 1891 of.....4,963		
Highest number enrolled in one term, City..	50,899	
" " " " " " Counties	109,416	
Total.....		160 315
Being an increase in 1891 of.....7,012		
Average number in daily attendance, City...	41,603	
" " " " " Counties	64,567	
Total.....		106,170
Being an increase in 1891 of.....3,819		

Number of teachers, City	1,244	
" " " Counties	2,723	
Total		3,967
Being an increase in 1891 of.....141		
Number of months schools were open, City	10	
Number of months schools were open, Counties	8.8	
Average for the State		9.2
Same as in 1890.		
Receipts from all sources, City	$ 842,886 76	
" " " " Counties	1,144,222 68	
Total		$1,987,109 44
Being an increase in 1891 of..... $143,689.28.		
Amount paid for teachers' salaries, City	$733,611 15	
" " " " " Counties	785,632 66	
Total		$1,519,243 81
Being an increase in 1891 of $61,717.30.		
Amount paid for building, repairing and furnishing school houses, City	$281,213 90	
Amount paid for building, repairing and furnishing school houses, Counties	105,407 43	
Total		$386,621 33
Being an increase in 1891 of..... $219,192.60.		
Amount paid for books and stationery, City	$47,743 79	
Amount paid for books and stationery, Counties	53,093 03	
Total		$100,836 82
Being an increase in 1891 of $9,874.82.		
Amount paid for rent, fuel and other incidentals, City	$95,478 97	
Amount paid for rent, fuel and other incidentals, Counties	55,826 02	
Total		$151,304 99
Being an increase in 1891 of..... $16,089.32.		

Total expenses for public school purposes, City	$1,158,047 81	
Total expenses for public school purposes, Counties	1,079,116 52	
Total		$2,237,164 33

Being an increase in 1891 of $294,967.00.

Excluding the city of Baltimore, the county schools show the following results:

Number of Schools	2,089	
Increase in 1891		42
Total number of scholars enrolled	123,456	
Increase in 1891		2,750
Highest number enrolled in one term	109,416	
Increase in 1891		4,963
Average number enrolled	98,142	
Increase in 1891		5,381
Average number in daily attendance	64,567	
Increase in 1891		1,880
Number in first grade	27,546	
Increase in 1891		1,816
Number in second grade	18,311	
Increase in 1891		1,604
Number in third grade	19,055	
Increase in 1891		665
Number in fourth grade	18,678	
Increase in 1891		758
Number in fifth grade	14,768	
Increase in 1891		764
Number in sixth grade	8,923	
Increase in 1891		303
Number above sixth grade	4,196	
Increase in 1891		825
Number studying bookkeeping	2,448	
Increase in 1891		225
Number studying algebra	5,427	
Increase in 1891		565
Number studying philosophy	3,427	
Decrease in 1891		67
Number studying drawing	27,516	
Increase in 1891		8,110
Number studying geometry	2,422	
Increase in 1891		486

Number studying physiology	16,767	
Increase in 1891		813
Number of teachers (including assistants) —Men—white, 739, colored 198; total	937	
Women—white, 1,511, colored 275; total	1,786	
Total	2,723	
Increase in 1891 of		84
Average number of months schools were open	8.8	
Same as in 1890.		
Amount received from State school tax, (white schools) free school fund, and academic donations	$385,762 25	
Increase in 1891		$11,034 84
Amount received from State school tax appropriated to colored schools	$98,581 41	
Decrease in 1891		10
Amount received from County tax	$490,811 81	
Increase in 1891		$50,635 64
Amount paid for teachers' salaries	$785,632 66	
Increase in 1891		$29,159 45
Amount paid for building, repairing and furnishing school houses	$105,407 43	
Increase in 1891		$24,345 05
Amount paid for books and stationery	$53,093 03	
Increase in 1891		$7,235 86
Amount paid for supervision and office expenses	$38,583 86	
Increase in 1891		$3,341 31
Amount paid for incidental expenses, including fuel and rent	$55,826 02	
Increase in 1891		$3,806 64
Amount paid for interest	$3,768 55	
Increase in 1891		$642 32
Amount paid for miscellaneous expenses	$20,921 28	
Decrease in 1891,		$639 73
Amount of indebtedness paid	$15,883 69	
Decrease in 1891		$15,250 94
Total expenses for the public school purposes in the counties	$1,079,116 52	
Increase in 1891		$52,639 96

The items of expenditure which show an increase are :

Teachers salaries	$29,159 45	
Building, repairing and furnishing	24,345 05	
Books and stationery	7,235 86	
Supervision and office expenses	3,341 31	
Incidental expenses, fuel and rent	3,806 64	
Interest	642 32	
Total		$68,530 63

The items which show a decrease are :

Miscellaneous	$ 639 73	
Indebtedness paid	15,250 94	
Total		$15,890 67
Showing a net increase of expenditure in 1891		$52,639 96

STATE TABLES.

STATE TABLES.

The State tables annexed present the usual summary of interesting facts.

Table "A" shows the population of Maryland by counties and the number of white and colored, according to the census of 1890.

Table "B" shows the population between 5 and 20, and the quarterly distribution of the State school tax to the white schools of the several counties and the city of Baltimore.

Table "C" shows the colored population between 5 and 20, and the quarterly distribution of the State school tax to colored schools of the several counties and the city of Baltimore.

Table "D" shows the assessed value of the property subject to taxation in the several counties, with the amounts, as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools" and "County School Tax."

Table "E" shows receipts from all sources with the totals (including balances carried over).

Table "F" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairing, and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and the totals.

Table "G" shows the number of pupils in the primary grades, and the number studying special branches.

Table "H" shows the number of schools in each county, the number of months schools were open, the number of teachers, male and female, the number of different pupils, the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "I" shows the cost of the colored schools and the statistics (under the same heads as those mentioned in Table "H") of the colored schools separately.

Table "K" shows the receipts from all sources for colored schools (including balance carried over).

Table "L" shows the expenditures for colored schools under the heads mentioned in Table "F."

Table "M" gives the statistics of the several colleges receiving State donations, and of the State Normal School.

Table "N" gives the statistics of the several schools and academies receiving State donations.

The county reports give in detail the enrollment and the average attendance for each term, and the expenses of each individual school, under the heads of rent, fuel, repairs, incidentals, furniture, blackboards and stoves, books and teachers' salaries. Every citizen can thus know what the school in his district has cost, and may become the auditor of the accounts. It is believed that no State in the Union furnishes a similarly minute detail of expenses.

Signed :

ELIHU E. JACKSON, GOVERNOR,
President.

REPORT

OF THE

SECRETARY.

REPORT OF THE SECRETARY.

The summary included in the report of the State Board of Education, and the State tables immediately following, give a comprehensive view of the condition of the Public Schools during the last school year, ending July 31st, 1891. The statistical reports of the Board of Commissioners of Public Schools of Baltimore City, and of the School Commissioners of the several Counties of the State, present, in minute detail, the facts concerning the schools, and show the receipts and disbursements for their support.

A copy of the following circular, dated November 23rd, 1891, was sent to each Examiner. The replies which are annexed, omitting formal address and conclusion, together with the statements accompanying the several reports, will doubtless be read with great interest.

DEAR SIR—A statement of the condition and prospects of the Public Schools of each County adds very much to the value of the Annual Report of the Public Schools of the State. It would therefore be very gratifying to the State Board of Education if you would make for publication a Supplemental Report of the Schools in your County stating:

1st. The general condition of the Schools, embracing attendance and progress.

2d. Estimating the interest of the public in the Public School System.

3d. Any marked advance or improvement in school buildings, furniture, equipments and appliances.

4th. The number and estimated size and quality of Public School Libraries.

5th. How Arbor Day was observed, and the estimated number and kinds of trees, shrubs, etc., plan ed by the Schools of the County.

6th. What improvement has there been in the character of School work during the year?

7th. What meetings of the teachers and School officers have occurred during the year, with your estimate of the results thereof.

8th. Any other information, and any suggestions, you may be pleased to add for the benefit of the Public School System.

If you will kindly furnish a Supplementary Report by December 15th it will be inserted in the Annual Report.

Very respectfully,

E. B. PRETTYMAN,

SECRETARY STATE BOARD OF EDUCATION.

DORCHESTER—Dr. James L. Bryan, Examiner.

Annual statements of the condition of the Public Schools of the State, rarely contain matter of great or startling import. The general interest in the cause of Public Education is assumed as natural, proper and patriotic. There are rarely, in any single county, such disturbances as threaten the policy of Public Education, and while a very large amount of money is annually expended for this purpose, the integrity of the school officials has been such that no loss or waste, or defalcation has ever occurred.

There remains, then, very litttle to report, except the steady progress and growth of the school system, and this is better done by comparison not of one year with the preceding one, as by comparison for large intervals of time—ten or twenty years. A census year is a good one, and although comparative statements of the schools in 1889, with those of 1865, when the general school system was inaugurated were made in the report of 1889, yet in this year, we may make comparison with the school work of 1881—ten yearsago—with gratificationand encouragement.

SCHOOLS IN 1881 AND 1891.

In 1881, Number of school houses,	79	white,	25	colored,	Total	104
In 1891, " " "	85	"	37	"	"	122
In 1881, Number of teachers,	93	"	27	"	"	120
In 1891, " "	103	"	38	"	"	141
In 1881, Schools having sufficient blackboards,	65	white,	21	colored,	"	86
In 1891, Schools having sufficient blackboards,	85	white,	30	colored,	"	115
In 1881, Different pupils for the year,	3,290	white,	1,253	col'd.	Total	4,543
In 1891, " " " " " "	3,889	"	1,942	"	"	5,831
In 1881, Pupils in average attendance,	1,338	"	530	"	"	1,868
In 1891, " " "	1,942	"	1,113	"	"	3,055

	White.	Colored.	
In 1881, Teachers' salaries	$21,363 90	$ 3,355 71	
Total			$ 24,719 61
In 1891, Teachers' salaries	$23,112 72	$ 4,365 08	
Total			$ 27,477 80
In 1881, Building school houses	$ 300 00		
Total			$ 300 00
In 1891, Building school houses	$ 4,798 62	$ 933 91	
Total			$ 5,732 53

In 1881, Furniture, blackboards, &c..	$ 205 97	$ $69 33	
Total.....			$ 275 30
In 1891, Furniture, blackboards, &c..	$ 2,224 93	$ 305 09	
Total.....			$ 2,530 02

In 1881, total expenses.....	$31,130 50
In 1891, " "	$50,913 18

A comparison of these numbers and the expenses incurred will show better than mere words, the advance made in the last ten years.

GENERAL INTEREST IN THE SCHOOLS.

The vital evidence of general interest in the schools, as obtained from the statistics of attendance and progress is most encouraging. While a general average of advance in these particulars cannot be calculated by a high percentage yet, progress is encouraging, and in this county such evidences are plain, unmistakable, and widespread. This is particularly encouraging as the population has increased very little.

The attendance slowly but steadily increases; the average attendance is better, notwithstanding the excuse for absences in the increasing demand for the labor of both races and of both sexes.

Other evidence is obtained from a comparison of the actual teaching work after regular intervals of time have elapsed. The introduction of better methods, more philosophical treatment of the system of education and in the development of the minds of pupils.

A material proof is in the demand for better houses and the appliances of education, as maps, globes, libraries, music—better text books and above all better teachers and more supervision.

IMPROVEMENT IN SCHOOL HOUSES.

In this county, the school houses that were in use in 1865 have, with one or two exceptions, been entirely abandoned, and new houses, built with reference to school work, with blackboards, modern desks, etc., have taken their place. In many cases the better houses, built in the early years of the general school system, from 1866 to 1876, have been found unsuitable or inadequate and larger buildings and appliances, undreamed of in 1866, have been

adopted. No school house is built now without arrangements for modern desks, slate blackboards, maps, globes, etc.

In the architectural arrangement, there has been advance. A local arrangement of vestibules has been found convenient. These additions to the front of the houses, now extend from side to side of the house, with three divisions of the room, thus gained, the middle third is the entrance, with exterior and interior doors, the latter a glazed one; the two side thirds of the vestibule are left *open to the school room*, and are used as cloak rooms for the two sexes. Portieres may be used in front with effect, and the small rooms may be used by assistant teachers for recitation purposes.

An experiment in school houses will probably be tried soon in this county, of carrying the side windows *above* the tops of blackboards *extending all around the room.* It is believed that the elevated windows can be easily managed for purposes of ventilation, and that more light coming *from above the study level* will be obtained, while greater room for blackboards is gained, and the outside views withdrawn from the observation of the pupils. The change would not increase the cost of such houses.

The adoption of out-buildings is almost complete in the county, while fencing and pumps for obtaining water conveniently are being gradually added.

SCHOOL LIBRARIES.

The necessity of using the limited fund at our disposal for the most important work of the instruction of the pupils entrusted to the school authorities, alone restrains the Board from the general adoption of Libraries and other additions to the means of instruction.

We have a few fine and well selected Libraries of 300 to 500 volumes each, and a large number of smaller Libraries of fifty to one hundred volumes. In many cases it is only necessary to inform the patrons of a school that the School Board will add $10 to a like amount raised by the people to make a beginning of this valuable addition to school facilities.

An earnest effort on the part of school men throughout the State to increase the State Free School Fund, by applying the return war tax to this purpose, and indeed increasing the principal of the fund from other sources, will doubtless be successful in obtaining fixed funds, which may be applied to the purchase of Libraries for the schools.

INSUFFICIENT SCHOOL FUNDS.

In no respects has there been less progress that in the increase of funds for school purposes. The splendid attempt in the Van Bokkelin system to raise a permanent fund, by applying annually 5 cents on $100 of the property of the State, to the formation of a State School Fund, was abandoned with the very adoption of the law, in consequence of the immediate need of all the money that could be raised. Had it been carried into effect, and the fund judiciously invested, we would now have almost enough money so invested, as to place the school system on a substantial basis, irrespective of the changes of parties or rulers in the State, or of financial revulsions.

THE STATE ACADEMIES.

The continuance of the Academies of the State, separate from the general school system should be abandoned. In most of the counties, a *modus vivendi* has been arranged, by which these institutions are made free Academies, or High Schools of the county. Several patriotic and public spirited Boards of Academy Trustees have had the necessary laws enacted for the transfer of such properties to the general school system. With a continuance of the special state aid, should a school law be enacted so that the few remaining Academies were thus added to the system, as capping stones to the several county school arrangements, the result would speedily prove the wisdom of the change.

People and Legislature should remember that times have changed since the day of the adoption of Academies for special classes and other relics of a very different and past age. To-day Legislation should be for the people—the whole people—giving special privileges and advantages to no one class in the community, but with equal rights to State benefactions and improvements to all the people of the State, thus bringing nearer and nearer together the rich and the poor, children alike of the same kind, loving mother, and alike protected by the great shield of a common statehood.

THE SCHOOLS FOR COLORED PUPILS.

The same generous and just appreciation of the rights of our fellow white men, leads naturally to the fair appropriation of common State funds for educational purposes to the colored people of the State. The School Law in Chap. XVIII, Section 96, says: "It shall be the duty of the

Board of County School Commissioners to establish one or more public schools in each election district for all colored youths, between six and twenty years of age, to which admission shall be free, and which shall be kept open as long as the other public schools of the particular county, *provided* the average attendance be not less than fifteen scholars."

And yet the necessary funds for the purpose are not provided. The State appropriates more pro rata to the colored pupils than to the white ones, but the county appropriations are not so divided, nor are they sufficient to carry out the purposes of the law in this regard.

We should never forget that public school systems result from the conviction that the education of the whole people of a State cannot be accomplished in any other way than by a State system and by State aid. That to be of benefit to the very class, which would be most injurious to a true republican statehood, the very means of education must be furnished systematically, regularly and fairly, and this can best be done by a tax upon all the property of the State. Such tax once raised becomes the property of the cause or interest for which it was levied, and then there can be no difference between white and colored pupils. Separate schools for the two races are a necessity, but there the difference ends, and all the expenses of the schools, their accounts, reports, are and should be upon a common basis and fairly proportioned.

Gov. Lloyd, as early as 1887, saw the necessity of such wise action, and bravely took the lead in advocacy of this fair distribution of school funds. He said in his message: "Under our present rule of distributing the State school tax, separate funds are appropriated to the white and colored schools. The colored schools first received $100,000 per annum (now $125,000), and the white schools the balance collected from said tax. No injustice is done the colored schools by this appropriation, for in proportion to population, they receive more than their full share. I believe the uniformity of the system requires no division of appropriations upon the color line. Separate schools must be maintained and impartially operated, but they should be under one system and paid from one common fund. They should be opened and kept open for the same period as the white schools in the counties and cities, and colored teachers should be placed in charge when desired if competent."

When we recall the fact that the fair fields of our State, the lowlands reclaimed from overflow of water, the roads

we travel, the gardens and orchards with their flowers and fruits—were all reclaimed from the dense forest, by the patient life-long service of the ancestors of the colored people, who are now with us as citizens of the State and the nation, we ought, as generous men, recognizing the faithful service of colored people while slaves of our fathers, to make some return to their descendents in this wise provision for their education and elevation. They are now our equals at the ballot box, and it is wisdom on our part to make that equality less dangerous to our interests, by making it an instructed, wise and elevated power. If it is wise, economical and patriotic to educate all white people, it is equally wise, economical and patriotic to educate and elevate colored people. With this elevation they become generally good and useful citizens. Without it, they become too often bad citizens, bad men and criminals. It is cheaper to keep people out of jail and prisons than to support them in idleness in them as punishment for violation of the law.

PUBLIC INTEREST IN THE SCHOOLS.

In estimating the interest of the public in the Public School system, it is sufficient to say that there is not a private school in Dorchester County. The whole people depend upon the school system for the education of their children.

ARBOR DAY.

Arbor Day was celebrated this year throughout the county. In the towns and villages trees were planted, but in the country such necessity did not exist as the country schools generally are located in groves. The care of trees, their history and value, were duly considered, and our young children recalled poetical or prose references to trees, and the blessings connected with them.

SCHOOL WORK.

In the actual school work there is better arrangement ment, more regularity, greater attention paid to good results than to any special means or methods; greater reliance upon acquired knowledge and independent methods than upon a servile reliance upon any system, method of textbook.

The development of the minds of the pupils has been marked in most of the schools of the county. The visits of

the Examiner have very often been relieved and brightened by the evidence of mental growth and by the desire for knowledge beyond the requirements of a common school course. With one hundred and forty teachers, like results could not be expected in all cases, but while some show little aptitude for the teacher's profession, yet, sometimes even sluggards wake up to a better knowledge of their work and duty and become able teachers.

TEACHERS' ASSOCIATION.

Teachers' Association for the upper part of the county are held annually. Another attempt will be made to organize such an association for the lower districts of the county, where the difficulties of regular attendance have heretofore proved insurmountable.

The irregular geography of that part of the county occasions, in great measure, this serious difficulty in the matter of attendance at teachers' associations.

BOARD WORK.

The School Board has met on an average about twice a month during the past year, besides giving personal attention to school affairs in the several commissioners districts. They have generally superintended the building and repair of school houses, selections of proper sites, etc.

CASH SYSTEM OF PAYMENTS.

In the matter of prompt payments of teachers' salaries, and indeed of nearly all the expenses incurred, there has been no cause of complaint. When the funds were not in hand when needed, the Board has secured the necessary means of paying promptly by borrowing money for short periods from banks. While a small expense is incurred by the discount of Board notes, the benefit to the teachers and other creditors has amply justified the small outlay.

AMENDMENTS BY THE STATE ASSOCIATION.

At the meeting of the State Association of school commissioners held in Baltimore, November 25 and 26, amongst other amendments to the school law, submitted by the committee which were favorably received, one recommending "the giving to School Boards positive authority to rent, lease, purchase and in other ways obtain property, houses, etc., for school purposes" was unanimously adopted. While

some contend that such power already exists, others think it would simplify matters greatly to have such powers conferred plainly in the school law.

ENLARGEMENT OF THE NORMAL SCHOOL.

The unanimous adoption of another recommendation of the committee, "to appropriate money for the enlargement of the normal school, and to provide for a larger attendance of students," was but a presentation of a need which is only too evident. The present quarters of the school are insufficient, and more rooms are now needed for the students in attendance, while large numbers of students are prevented from attending the school on account of the insufficiency of the present building to afford the necessary accommodations.

APPOINTMENT OF SCHOOL BOARDS.

The association evidently preferred the continuance of the appointment of School Boards by the Circuit Judges. Should minority representation be added to this arrangement, nearly all causes of discontent with the school system would have an end.

FREDERICK—GLENN H. WORTHINGTON, Examiner.

Dear Sir:—In addition to the statistical tables contained in my fourth and last report of the Public Schools, of Frederick county, for the year ended July 31, 1891, I desire to make some observations and suggestions, with the view of better showing their present condition, and of recommending improvements in the system.

The "Summary of School Statistics," shows that the total number of pupils enrolled during the year was 10,406, an increase of 53 over last year.

The average daily attendance for the three full terms was 5,803, an increase of 109 over last year.

The percentage of daily attendance, based on average enrollment for each of the three terms, was 66.3 per cent, against 66.7 per cent last year.

The cost per capita the past year for the three full terms was for white children $8.00, and for colored children $5.80, against $8.17 for white children, and $5.94 for colored children, last year.

The cost per capita for the extra month was for white children $1.26 and for colored children $1.00, against $1.25

and $1.05, respectively, last year; thus, making the total cost per capita, for the full year $9.26 for white children, and $6.94 for colored children, as against $9.42 and $6.99, respectively, last year.

These figures, on the whole, compare favorably with last year, showing an increased enrollment and daily attendance, and a decrease in the cost per capita.

LENGTH OF SCHOOL YEAR.

For the second time in many years the schools were kept open the past year for an extra month, or two-fifths of a term. During that extra month about 5,000 small children, who, owing to bad roads and bad weather, were unable to attend school regularly during the winter, received instruction in the Public Schools and made rapid progress in their grades, much more so than was possible when the school room was crowded with the larger boys and girls who require the greatest part of the teacher's time and attention. The per centage of daily attendence during the extra month was 71.7, against 72.2 last year.

FINANCIAL.

The financial statement shows that the total receipts from all sources, exclusive of the balance on hand at the beginning of the year, was $79,281.02, which amount includes the income from the Free School Fund for two years, the fund not having been received last year in time to be included in the statement of that year. The receipts are therefore larger than would otherwise have been the case by about $3,500, which is in round numbers the sum usually received from the fund in one year. The disbursements amounted to $73,750.50. At the close of the year there was a balance on hand, of $6,855.82, which is larger than any amount remaining on hand at the end of the year, for many years.

In 1886, there was a temporary loan due at the close of the year, amounting to $6,000. In 1887 the amount due was reduced to $5,000. In 1888, the loan was entirely paid, and a balance remained in the treasury of $193.71 In 1889 the balance reached $2,817.98; in 1890 it was $1,325.30, and the last year, as stated, it was $6,855.82.

This satisfactory showing is due in some measure to an advantageous exchange of books, affected during the administration of Prof. F. R. Neighbours, by which a considerable sum was saved in the cost of books for several years, and in some measure to the larger appropriations received

from the State during the comptrollership of Hon. L. Victor Baughman. From him we received nearly $4,000.00 more in one year than from any of his predecessors in office. The County Commissioners also have not denied us the usual appropriation of 14¾ cents on the $100.00, and thus the Board is at last relieved from the burden and inconvenience of a shortness of revenue, under which it labored for so many years. It is sincerely to be hoped that a sum equal to the requirements will be ungrudgingly allowed by the County Commissioners in future, as the maintenance of the Public Schools upon an effective basis can only be accomplished by a wise and liberal policy, which recognizes public instruction as an important factor in our system of government, one that tends to make life and property and the peace of society more secure.

TEXT BOOKS.

No change in text books was made during the past year. The grammars and readers adopted in 1890 are giving satisfaction, the teachers being especially pleased with the new grammars. After examining a score of text books on the subject, I finally selected Raub's series, as best adapted to our needs. His "Lessons in English" seems to occupy the golden mean between the too technical and the too general, and while it is primarily intended to present an introductory course preparatory to the study of grammar as a science, yet pupils who have learned thoroughly all that it contains need not for practical purposes pursue the subject further. Teachers are enthusiastic over it, and pupils no longer show the great distaste for grammar, which they formerly did when the old book was in use. The Practical Grammar is but little inferior to any other that I examined. Butler's series of readers meet with the general approval of teachers. The books are substantially bound, the type large, and the quality of the paper excellent.

COURSE OF INSTRUCTION.

The course of instruction prepared during the first year of my incumbency of the office of Examiner (1888), continues to be the guide to teachers in their school work. The several grades are becoming gradually more nearly uniform in the different schools as a result of its use—complete uniformity being a consummation devoutly to be wished. A few of the older teachers fail to give the schedule a cordial reception into their schools, and their

school work invariably shows a lack of system and unsatisfactory progress in consequence. It is to be observed, however, that the best teachers among the experienced ones, and especially the younger teachers and the graduates of the Normal School, heartily approve of the course of instruction and have adopted it as their standard of duty. In the course of time I feel well assured that the object aimed at in the preparation of the schedule, viz.: the thorough systematizing of school work, will be accomplished.

CERTIFICATES OF SCHOLARSHIP.

In 1890, the plan of awarding certificates of Scholarship, to such pupils as should complete the course of instruction, prescribed for the Public Schools was adopted, and the first numbers (16) of these certificates were awarded at the close of the scholastic year. A second lot (18) were awarded at the close of the past year, making the total 34. The certificates are awarded only in cases where the following instructions are strictly complied with :

Applicants must be examined on the days set by the Examiner for holding the examination, and they must make a general average of 80 per cent. in all their studies, and not less than 60 per cent. in any one branch, the examination to be held with the questions prepared by the Examiner for the "above sixth grade."

Any applicant who receives unfair assistance from any source forfeits his right to a certificate.

Teachers are requested to examine and mark the papers of applicants, and to record the marks as in the case of pupils in the other grades, and to send to the school office the papers of such applicants as appear to be entitled to certificates. At the school office, the Examiner reinspects the papers and grants certificates only to such as to him appear to be entitled to receive them. The fact that out of an enrollment of over 10,000 pupils, only 16 or 18 certificates have been granted in one year, proves that they are not awarded except to the few who appear by the papers submitted to be entitled to the distinction.

The certificates are intended to mark the successful completion of the common school course, and to furnish tangible evidences of the holder's proficiency in the elementary branches of knowledge.

When framed the certificates present a very attractive appearance, and throughout the county there is an endeavor on the part of pupils of the "above sixth" grade to earn

them. I believe the certificates serve a good purpose, stimulating the ambitions, furnishing an incentive to regular attendance, and crowning the work of those of limited opportunities by putting into their hands a permanent testimonial of their advancement.

PENSIONS FOR OLD TEACHERS.

It is a pitiable spectacle to see the old and infirm teachers of this county occupying quarters at the almshouse, and depending upon public charity for the remainder of a barren existence; men who spent the best years of their lives in the schoolroom, and devoted their energies and talents to training youth and fitting them for positions of usefulness and honor in society ; made heavy at heart by the constant worry and vexation incident to their vocation ; paid salaries barely sufficient to enable them to provide themselves with the neccessaries of life, toiling on until at last nature oppressed and harassed out with care they find themselves no longer equal to the task they have so long performed, and unfitted for any other, they betake them to the poor house and finally fill a pauper's grave.

I consider it a great defect in our school law that no provision is made for these aged teachers, intended to furnish them a means of respectable support after their life's work is done.

If, for instance, the School Boards of the several counties were authorized to retire on full pay all male teachers who have attained the age of 60 years, and who have taught in the public schools of the county for 35 years, and all female teachers of the age of 50 years who have taught for 30 years, the future prospects of those now devoting their life to the task of teaching would be brightened, and there would be more teachers willing to make teaching their life work if provision were made for passing their latter days in ease, comfort, and much needed rest.

I trust that the matter of enacting such an amendment to the present law may receive the early attention of our legislators.

PUBLIC SCHOOL SYSTEM.

Nothwithstanding all that has been said by eminent statesmen and economists in favor of the public schools, and notwithstanding their manifest utility and importance, as a part of our free institutions there are still many persons who do not seem fully to appreciate them and do not hold them in high esteem. It behooves every man who

believes the public schools to be an important, nay indispensable factor in our government, to proclaim in their favor on every occasion, and to do whatever lies in his power to promote their efficiency and usefulness.

NEW SCHOOL HOUSES.

During the year there were contracts awarded for the erection of four new schoolhouses; one a double brick schoolhouse at Utica, one a frame house at Sandy Run, one a frame house at Greenfield Mills, for the use of colored children, and a two-story brick addition to the Church Street School in Frederick City. These added to the number reported last year, make the total number of houses belonging to the county 157, of which 61 are brick, 65 frame, 16 stone and 15 log. The total cost of the new buildings approximates $6,500.

TEACHERS' MEETINGS.

A meeting of teachers is held in Frederick City on every pay day, except the last during the year. At these meetings important questions are discussed, and much benefit is derived from them. There are also two or three district associations which meet at least once in each term and discuss educational topics. When properly conducted, this bringing of the teachers together for the exchange of views and experiences is highly beneficial. If a good program has been made out before hand, and the teachers assigned to each subject come prepared, the meetings are highly interesting and instructive; on the other hand, where the teachers are restless and indifferent the meetings are of small value.

CONCLUSION.

Having resigned my position to take effect August 31st, 1891, my official relations with the public schools will soon terminate. I cannot but believe that the schools have made progress during my administration of the office and that the work of the teachers is becoming more and more effective.

I leave my duties as County Examiner to begin the practice of my chosen profession, but I shall still have a deep interest in the public schools and shall stand ever ready to promote in every way that lies in my power, their utility as agencies for the general diffusion of knowledge, of patriotism and of sound morality among the people.

HARFORD—JOHN D. WORTHINGTON, Examiner.

Dear Sir:—I believe that the past year has been fruitful of good work in the schools throughout our County. Our large school at Darlington is now enjoying the commodious building briefly referred to in my last report, and is doing much better work than was possible in its old, cramped quarters; while the Aberdeen school has nearly doubled in daily attendance since the house has been sufficiently enlarged to accommodate the youth of this rapidly growing town.

It is greatly to be regretted that parents are not more careful to keep their *little* children regularly in school. If they did, these children would acquire a fair primary education before their services were of any especial value to the parent, and could then leave the schoolroom at the age of fourteen or fifteen years with a good degree of mental and physical vigor.

We are anxiously looking forward for a new assessment of property which will, we think, bring into the lists much property not now reached and thus swell our revenue without an increase of the tax rate. Our County Commissioners for the last two or three years have responded to nearly all calls made upon them by the Board; the levy of twenty cents on the one hundred dollars made last June is a fairly generous one, but with our increasing needs does not yield sufficient revenue to meet the annual needs of the schools with the present taxable basis.

In this connection it is not inappropriate to point to our unequal struggle with most of the other States of the Union (notably the Western and New England States), in our lack of a permanent school fund. While nearly all of them have a large annual income from their permanent fund, chiefly created by the early disposal of their public lands, Maryland's fund is very small.

It is to be hoped, that at no late day, the Legislature will take the necessary steps to enlarge this fund, and thus relieve the counties of a part of their direct taxation for school purposes.

The teachers of the county were not a little gratified to learn from the Secretary's report last July, that Harford had proved herself the banner county in its membership in the State Teachers' Reading Circle. We sincerely hope that the course will be continued to its completion by these members, and I have no doubt that our school children will profit greatly by the enriched education of their teachers. I think I can already see the good effects in the

increasing growth of the district libraries. During the year the board extended the aid provided by law ($10 per school) for the formation of nine new ones.

Arbor Day was enthusiastically observed in the most of our schools. It is estimated that three hundred trees and many vines and shrubs were planted on the grounds, and we hope that a fostering love for nature's products was implanted in some five thousand young bosoms.

A successful Institute was held Aug. 31—Sept. 4, and we desire hereby, on behalf of the teachers of the county to express their thanks to the members of the Normal School Faculty, and Miss Agnes E. Durst, of the Directory of the Reading Circle, for their services, which did so much towards the entertainment and improvement of the corps.

HOWARD—John T. Thompson, Examiner.

Dear Sir.—In response to your request for a supplementary report, we beg leave to submit the following, covering in their order the several points enumerated by you :

1st.—The report for the year just ended is the sixth annual report made since the present school officials came into office in Howard County. The first report, for the year 1885–6, showed an enrollment of 3,000 pupils, of whom 2,250 were white and 750 were colored. The past year the total enrollment was 3,028, or an increase of 28 in five years. The number of white children enrolled was 2,233, and of colored children, 795. This shows a loss of 17 white, and a gain of 45 colored children, in these five years. In the same time, however, the average attendance of white children has increased from 1,084 to 1,165, while the average attendance of colored children has fallen of from 286 to 279. In view of the fact, that the number of colored schools has increased in the meantime, this falling off in attendance is not encouraging. But we believe our schools generally are moving onward and upward. The schools are certainly much better graded now than ever before ; and, while the lower branches are being more thoroughly taught, the number of pupils in each of the higher branches is increasing from year to year. From the report for the year 1884-5 we take the following : Number of pupils in bookkeeping, 18 ; algebra, 56 ; philosophy, 48 ; drawing, 0 ; geometry, 8 ; physiology, 0 ; latin, 8. The report for the year just ended gives the

following numbers in the same studies: In bookkeeping, 56; algebra, 78; philosphy, 69; drawing, 1,330; geometry, 50; physiolgy, 441; latin, 13. These figures show a decided increase, notably in geometry, physiology and drawing. These are a few of the results of our effort to increase the efficiency and usefulness of the public schools since they have been under our charge.

2d and 3d.—The people of this county are in hearty sympathy with our public school system, and are generous in their support of the same. The school levy during the past few years has been larger than ever before in the history of the county. But the number of schools is increasing also. In 1874 there were only 35 schools in the county. Now there are 58 schools, of which 43 are for white and 15 for colored children. And these schools all demand, and receive better houses, better furniture, and better equipments generally, than our fathers had in their days. During the past six years we have spent $2,996.96 for desks, black-boards and stoves. During the same time we have spent $1,654.19 for repairs, and $11,527.35 for new school houses. Thus, with increased receipts have come also greater demands and increased expenses. Some new furniture is still called for, and three or four more new houses may be needed in the near future to take the places of those that are now somewhat out of date; but houses and furniture both are probably in a far better condition now than they have ever been since we have had a public school system in the county. In supplying maps, globes and other useful school apparatus we have not made much advance over previous years. We should turn our attention to these things at an early date.

4th.—As to the number and size of our public school libraries, we have not very much to boast of just now. There are not more than five or six such libraries in the whole county, and even these few are quite small and of modest pretensions. The requisitions on the school board on account of the library fund during the past six years have amounted to only seventy dollars. A like amount, of course, has been raised by the friends and patrons of these few schools. This is a very poor showing, and does not this condition of things, if it is the same elswhere in our State, show the need at this time of a special library fund, such as the returned war tax would afford? Let our law makers consider this matter well before they dispose of that money.

5th.—Of the observance of Arbor Day we have the following to report: About two-thirds of our schools, pur-

suant to the Governor's proclamation, observed the last Arbor Day by planting trees, vines and shrubbery. The total number planted was 521, of which 222 were flowers, bushes, vines and shrubs of various and many kinds. The number of trees, including fruit and shade trees, was 299. The following are the kinds planted, with the number of each kind: Plum, 5; peaches 20; apple, 17; pear, 4; cherry, 28; persimmon, 2; damson, 1; chestnut, 2; mulberry, 6; hickory, 3; walnut, 2; gum, 1; sassafras, 1; oak, 4; beech, 3; dogwood, 6; locust, 7; willow, 10; poplar, 11; pine, 17; maple, 68; cedar, 81. As we failed to obtain full reports for the previous year, we cannot say whether the above figures show an increase, or not, over those of that year; but we believe our children have taken a deep and abiding interest in the planting of flowers and trees around their school houses, as well as at their homes. It is a beautiful and commendable practice.

6th.—In regard to the improvement in the character of our school work during the past year, we have but little to say in addition to what has already been noted above. Our teachers are better prepared for their work now than formerly, and the results of their labors are more satisfactory to all concerned. Howard County has now as efficient and as faithful a body of teachers as can be found in this State. The teachers are nearly always in the fullest accord with us in our efforts to raise the standard of education in this county. A better grading of our schools, and a system of written examinations, first enforced a few years ago, have secured better results year by year. The improvement still goes on.

7th.—No teacher's institute has been held in Howard County for a number of years. This is a thing much to be regretted. But there were held, during the past year, four meetings of the teachers' association. At these meetings many questions of interest to the teachers were discussed. At some of them we had the assistance of teachers from the State Normal school. We believe these meetings, when properly conducted, to be of great benefit to the teachers in their work in the school room. But we look forward hopefully to the day when the teachers' institute will be an established agency in our public school system.

8th.—Our financial statement for the year just ended shows total receipts from all sources, including a balance of $1,455.05 from the previous year, of $29,500.01, and total expenditures of $26,394.14. This leaves a cash balance of $3,105.87 on hand at the end of the year. This is the largest balance reported since the year 1874. The

balance then reported was a part of the accumulated High School fund that had been turned into the general treasury a year or two before. From that time up to one year ago the balance seemed to be on the wrong side of the account. The school boards never had money enough to keep the schools running on full time, and to meet the constant demand for new houses and new furniture. The inevitable result was a debt. This debt kept on growing larger and larger, till it reached, about six years ago, the sum of $5,000.00, an amount which is quite large for our small county. That was the condition of our finances when we assumed charge of the schools in January, 1886. It was our constant aim to reduce and extinguish that debt. Two years ago we promised to show a balance on hand at the end of the year. That promise was kept, and the balance of $1,455.05, then reported, has been more than doubled at the end of another year. About one half of this balance of $3,105.87 has since been used in paying for three new school houses that have been completed during the current fiscal year. The total cost of these houses was about $1,800.00, of which amount $288.14 was paid during the year just ended, and is so reported. All of these buildings are substantial, well ventilated and commodious. New desks and slate blackboards have been placed in all three, and they are now among the best equipped schools in the county. Demands are still heard, from time to time, for opening new schools in various sections of the county, but we have to move slowly in this matter. We have about as many schools now as we can well support with our present income. The school board should never again go in debt. Our expenses should never exceed our receipts. In other words, we ought not to live beyond our means.

SOMERSET—W. H. Dashiell, Examiner.

Dear Sir:—I submit herewith our report for the year ending July 31, 1891. The schools of the county are in excellent condition; they are well graded, and the teachers are doing good work. Teachers' Associations, white and colored, are held semi-annually and are well attended. These associations were organized in 1886.

Arbor Day has been celebrated each year since its origin. Several hundred shade and fruit trees were planted.

Where tree planting was deemed expedient the day was devoted to the improvement of the school grounds.

Our Board is making every effort to secure a better class of school buildings, and each year adds to the list of new ones, all of which are furnished with modern furniture and improvements. New furniture has also been placed in a number of the old buildings.

An arrangement has been made with the trustees of the Washington Academy, the oldest institution of learning in this county, by which property to the amount of $5,000 has been turned over to the school board to aid in erecting a new high school building at Princess Anne. The old building, known as the "Old Academy" situated about two miles from town has been taken down and the bricks have been removed to town to be used in the new building. The plans and specifications are ready and the contract will be let out at once. When completed, it will be one of the handsomest buildings in the State.

Washington Academy was incorporated in 1779. It was reincorporated and united with the Franklin school (a similiar institution in Princess Anne), in 1841. The sessions were held at the "Old Academy" until 1842, when they were held in the Franklin school building, which was removed to its present site in 1843. Washington Academy was first connected with the public school system in 1872, but the old board of trustees have always managed the property and the equipment, the school board supplying teachers. The present building is greatly out of repair and is too small to accommodate the increased attendance. Of the amount reported for building schoolhouses the sum of $500 has been expended in preparations for this building.

ST. MARY'S—Henry Wingate, Examiner.

Dear Sir :—Although we have but little to add in the way of a Supplemental Report, yet we feel it our duty to respond to your courteous request of the 23rd ultimo.

It is gratifying to be able to report an increase of nearly 8 per cent. in the number of pupils enrolled during the year, as compared with the year ended July 31st, 1890, yet we regret that the average attendance in most of our schools is not such as to insure the best results. This irregular attendance is due to the fact that most of our

population are engaged in agricultural pursuits, and the children are kept home during the busy season to assist with farm work, a necessity due to straitened circumstances resulting from low prices of farm products. In some localities we found, however, the schools well attended during the busy season, but most of the children were too small to be of much use on the farm. This, we think, goes to show that there is no lack of interest in Public Education.

We have made many improvements in buildings and furniture. Still, a few of the old school houses are seen in our midst. Nothing can be done with them to fit them for the purpose to which they are applied. New and properly constructed houses are absolutely necessary. Fortunately the amount of our appropriation seems ample, if properly husbanded, sufficient for the purpose, and it is to be hoped that we may soon see the last of the old style of buildings that have stood as a blot upon our civilization in being recognized as fit for educational uses.

Our schools are not properly supplied with maps, charts, and other equipments which are necessary to the achievement of the best results. These much needed appurtenances would have been supplied ere this, but for the scarcity of funds, and a desire on our part to operate our schools for the full year of ten months.

There are no Public School Libraries in the County, and while we recognize the fact, that they would be of great value, still we are powerless, for the reason just assigned, to attempt to establish them at present.

Arbor Day has been generally observed in our schools, and where the schools are not already surrounded by a growth of wood, trees and shrubbery have been planted.

Our Teachers' Association was well attended at each of the four meetings during the past year; and by the free interchange of views in reference to their work, has had a good influence over the teachers in giving a fresh impulse to their minds, and by giving more enlightened views of their duties and responsibilities.

Our schools are in a prosperous condition, and continue to grow in favor with the public. Their popularity is evidenced by the frequent and urgent appeals to the Board for new school houses, as well in localities where there are none, as in lieu of old and dilapidated ones. Our teachers are aroused to the importance of their work, and the corps, with few exceptions, is composed of intelligent ladies and gentlemen who are earnest and conscientious in the discharge of their duties.

TALBOT—ALEXANDER CHAPLAIN, Examiner.

The work of examining, supervising, systematizing, and directing the movement of successful school work, in addition to the office duties of the Examiner, taxes to the utmost his highest efforts of thought, judgment, and activity. The Examiner may be a practical and successful teacher, able to devise a system of school work, but it requires executive ability to put that work upon a high plane of excellence in every school of his county. It is not enough that the Examiner be qualified, by his practical knowledge as a teacher, to devise and inaugurate plans for artistic school work; but he must put into his efforts for the elevation of his schools, conscience, brains, zeal and untiring industry. If we expect hard work from our teachers, we must set the example, and then urge them to follow.

During the school year just closed our teachers, as a body, have been faithful, conscientious, and generally successful. The benefits of the Reading Circle work that has been done by our teachers have been manifested in every department of school economy, government, instruction, discipline. As soon as a teacher grasps the full meaning of the term *apperception* and its application and force in school work, his teaching is at once reconstructed, and improved instruction is the pronounced and visible outcome. And as soon as a teacher has studied the *will side* of child nature, and comes to fully understand the meaning of the terms *objective will* and *subjective will*, discipline, or child training, has for him a new import and significance that quickens his sense of personal responsibility, and henceforth every detail of his school work takes on a higher and nobler importance.

Nothing has assisted me in one line of my duty as school examiner—the development of artistic teaching—so much as the Reading Circle course of study among our corps of instructors; and we confidently commend it to all school officers, examiners, and teachers.

TEACHERS' INSTITUTE.

Our Institute was held for five days, but the time was too short to develop half of the work that was planned. Some of it, however, can be taken up at the Institute of next year at the point we left it this year, particularly the drawing and color work.

Some of the work of the instructor in drawing at the Institute was afterwards criticised, we understand, by one or

two of the visiting public. This was because these critics misunderstood the scope and purpose of the work. The lessons in drawing were planned with a view of combining, as far as practicable, for the teachers, in so limited number of lessons, instruction in freehand drawing, geometrical drawing, and form study.

It is now conceded by all advanced educators that form study should be made the basis of primary number work and oral language work. Superintendent Powell of Washington City says: "Subjects of thought must be presented to the child first through the senses. He must be made to know through original channels of information. The best possible work in exact seeing is the study of forms offered in exercises that come under the head of drawing. The lessons given under this head are, first, the modelling of forms in clay in imitation of forms presented to the child. These lessons train his eye, his judgment and hand—co-workers for the accomplishment of a definite purpose. Then he is carefully trained to talk about the forms he has made. Other kinds of work under the head of drawing are stick-laying, paper-folding and combining geometric forms in wood or in paper, all of which, after being made, are represented with pencil, and in turn are described. Some of these are compared and the processes of doing given, which is narration. It is thus seen that much exact language training is possible under the head of drawing. Good work will begin simultaneously with the number lessons which take their start in the form lessons in making simple problems and in solving them."

PRIMARY NUMBER WORK.

In primary number work we use drawing as a means and not an end. Indeed, in the objective stage of number teaching, drawing is indispensable. The necessary antecedent of the formal teaching of mathematics is the training of the imagination; such a training as will give to the child clearly defined concepts of things which he can recall, analyze and compare at will. Without clear concepts he has no data upon which to base his reasoning and conclusions. A pupil's real progress in number is measured by his powers to think of things independent of their concrete manifestation. To ignore the objective stage in number teaching, and to proceed in the usual way of presenting the abstract number, is to create in the beginning a dislike to the subject on the part of the child. The natural growth of this subject in the child's mind is in seeing rela-

tions of quantities, and then the relations of numbers. The child sees the relations of quantities by comparison of quantities. All along the line of number teaching we have been using too much *analysis* and too little *comparison.*

The child easily apprehends small groups before he analyzes them into units. Proceeding, then, as in teaching reading by the word method, after the child has learned groups he is then ready to reconstruct them into smaller groups and units. On this basis the finding of fractional parts is easy, and begins with the first steps, separating first by quantity, and not by exact numbers. There is no reason why fractions should be to pupils one of the most difficult subjects in arithmetic. If the conceptions of fractions are gained from sense perception, they present no more difficulty than integers learned in the same way.

Always keep in mind that the study of quantity should always be so pursued as to create a demand for limitation by number. Do not give in your teaching all your attention to the number and none to the quantity. It is often easier for the child to see the relations of number through first seeing the relations of quantity.

Teach numbers, in the following order: 2, 4, 8; 3, 6, 9; 5, 10; and 7 last. You will perceive that numbers in the first group separate naturally into groups of 2's; and those of the second, into groups of 3's.

In our new departure in the lines of primary number work, form study and language work through form lessons, elementary science lessons and drawing and color lessons, our teachers have shown nice discernment of the successive steps of development and repetition; and we thank them for the intelligent and hearty co-operation with which they never fail to respond in any movement that promises to sustain and advance the high character of our public schools.

PUBLIC SCHOOL EXHIBIT AT OUR COUNTY FAIR.

The new accommodations provided this year by the Directors of our County Fair for the Public School Exhibit proved to be a room entirely too small either to display the work properly and according to the school grading or to hold with comfort, at certain hours of the day, the crowds of people who sought admittance.

The exhibit from the higher grades, in every department of school work, was superior to that of any former year, and showed that the teachers had covered the ground

laid out in the grading with clearer views and more definite purpose.

The exhibit from the lower grades, however, more than met my expectations, and showed that the teachers in these grades had grasped the meaning of the plan of the grade work, with its symmetry and successive steps towards synthetic power for the pupil. The illustrated number work of the 1st, 2nd, and 3rd grades was particularly fine and attractive. The language work through elementary science lessons, and drawing and color-work lessons, of the 3rd, 4th and 5th grades, was studied attentively by hundreds of people from day to day.

Where the program is so full that there is not time to give special attention to teaching form and elementary science, the lessons can be used as a means of teaching language and developing synthetic power in the pupil. When the children bring wild flowers to school in the early spring, and with the teacher study them, compare them, draw them, paint them, and then describe them in either oral or written language, the purpose is to give accurate training in the use of language; but, at the same time, the pupils are learning botany, enriching their minds with knowledge, and developing their comparing and concluding faculties.

At the opening of school in September the lower grade pupils begin to study insects and animals, comparing, and writing descriptions, likenesses, and differences, etc.; they are incited to thought, and the subject is so presented by the teacher as to direct them toward accurate and right thinking. As indicated above, in the early spring, the children begin to study and compare plants and wild flowers. They plant seed and watch and describe the development of plant life. All of this work, especially drawing and coloring flowers, is attractive to children.

Some of the third grade pupils studied earth worms, drew their "casting" neatly on drawing paper, and then wrote the story of their study. Some third grade pupils planted beans, and when they sprouted and began to grow, each pupil digs up a bean, draws it and the plant neatly on drawing paper, and writes the story of his study.

Here is a specimen of work in each one of the above studies, showing, we think, both mind development and good language training.

EARTH WORMS

I never saw earth worms rain down or ever heard of anybody that did, but if they come from the ground I don't

see how they get into barrels and porches because they have not feet to crawl up there with.

When the earth worms have made little hills by throwing up the earth, they are called castings. Then when it rains I think that the castings are pushed back into the hollows which the earth worms have made and the earth worm has to do all his work again.

THE BEAN.

We soaked the beans and then planted them. We noticed that those which had heat, light and moisture came up first.

After the bean had been in the ground a while we took it up and made this picture of it.

SCHOOL LIBRARIES.

Very few schools have made any systematic efforts to procure school libraries ; and, perhaps, 400 volumes would be a proper estimate for all library books in the county, not counting those temporarily loaned to the different schools by teachers, and a small number loaned by pupils.

A few of our most energetic teachers, who feel the need of books in their schools for supplementary reading, for information, for reference, or for elementary science teaching, contribute money themselves towards purchasing them, and raise more by musical and dramatic entertainments, garden parties, fairs and lunches. The question of libraries will, we think, settle itself with time and school progress. When teachers feel the need of a library they will find a way for supplying that need. Let us wait patiently ; for "they, too, serve who only stand and wait."

For the present all money appropriated by the county for libraries should be spent in procuring books for supplementary reading, elementary science teaching, and particularly for a great variety of text books upon every culture study in the public school curriculum. We cannot lay too much stress upon supplying a great variety of text books. On this point Superintendent Channing Folsom, Dover, N. H., wisely says : "With a variety of text books the pupil learns how to study, and the teacher learns how to teach."

TEACHERS' ASSOCIATION.

Our Teachers' Association continues to hold regular quarterly meetings. These meetings are well attended,

and build up the professional spirit of our teachers. The State Superintendent inspected the work and spirit of our schools in the month of March last, and also gave a day to attendance at a meeting of our Teachers' Association. He addressed the meeting, and spoke flatteringly of the intelligence, bearing, spirit and work of our teachers.

In conclusion, I desire to thank you for your uniform and cordial confidence and support in the discharge of my official duties.

WASHINGTON—P. A. Witmer, Examiner.

Efforts have for years been made to encourage the establishment of School District Libraries, but as communities or districts are unwilling or unable to raise funds for the purpose, and as our Board has not felt authorized under the law to make appropriations for that purpose, except where the districts has raised a certain sum, not many district libraries have been established. There are probably ten or twelve districts which have small libraries, consisting principally of books of reference. It is the policy of our Board to control to a certain extent the selection of books for districts, as experience has demonstrated that the judgment of the pupils and of individual teachers, in the selection of books, is not always the safest guide. Whenever a district has accumulated ten dollars and makes application to the Board for an appropriation of like amount, the latter requires that a list of the books, which it is proposed to purchase, shall be furnished to the School Board for approval.

The number of volumes in the different district libraries ranges from twenty to one hundred.

Arbor Day was generally observed throughout the county, and very interesting exercises were held at many of the schoolhouses, in the presence of patrons and friends who expressed decided approval of the work done in this direction.

Although I did not receive detailed reports from all the schools, I think the number of trees planted may be reasonably estimated at 500.

The only Teachers' Meetings held in the county during the year have been District Institutes and Reading Circles. There has been no meeting of all the teachers in the county during the year. The District Institutes, wherever organized, meet once a month, and are generally very well attended.

There are only three or four Reading Circles in the county, and I regret to say that our teachers have not shown that appreciation of the value of this important adjunct of professional culture and improvement to which I believe it fully entitled.

HIGH SCHOOLS AND ACADEMIES.

Table "*N*" exhibits the condition and work of these important institutions, and the amount of the donation each receives from the State.

Colleges.

Table "*M*" gives a list of the Colleges receiving aid from the State, and shows severally, the number and sex of the students, the branches taught, and the amount of State donation.

A copy of the following circular, dated November 30, 1891, was sent to the Principals or Presidents of said Schools and Colleges, and the annexed replies were received.

Dear Sir—I will be pleased to receive from you a supplementary report of the condition, work and prospects of the Institution under your charge for publication in the Annual Report of Public Schools of Maryland, if you will kindly furnish it by December 15th, 1891.

Very respectfully,

E. B. PRETTYMAN,
Secretary.

BROOKEVILLE ACADEMY, Montgomery County—
J. D. Warfield, Principal.

The Academy, in the midst of its extensive lawn of evergreens, commanding and handsome, is now thoroughly equipped for its highest work. Besides the large and well arranged gymnasium lately erected, there now stands a handsome room just finished for the accommodation of

students coming daily. Within there is a well organized laboratory, furnished with a good selection of physical apparatus, including a Toepler-Holtz, imported for the Academy by A. Wily & Co , and a chemical outfit sufficient to carry on ordinary laboratory work.

A cabinet of specimens, illustrative of Prof. Mitchell's Geological Excursions, has been secured by the principal, and is increased almost daily from the fields. He has just purchased for the classes in physiology a complete list of anatomical charts, including a manikin of life size.

In geographical and astronomical studies, Yaggey's complete outfit for illustrations in all the changes of the moon, the earth and other planets, has also been added to the ornamental work of the school room.

A dictation exercise, in geological composition, is given each week to the advanced members. The professor in charge of the scientific course of the Academy, Prof. Wm. H. Peltz, late of Peekskill Military Academy, will be pleased to identify any rocks of the State furnished him free of cost. The drawing department in charge of Miss Elise Hutton, exhibits splendid work from models.

The well-chosen library, which has made Brookeville a centre of educational reading for years, is now located at the Academy and is open to its members as of old.

During the present principal's charge, seventy-five students have matriculated. The business feature of the institution is best made apparent in its ability to put young men into the counting room of any business house in Maryland.

The building is now supplied with an abundance of spring water, by means of the Davis-Hydraulic Motor lately introduced. A good chalybeate spring is also upon the premises, and a pump of mineral water at its door.

BEL-AIR ACADEMY, HARFORD CO.—HENRY A. BACHTELL, Principal.

Sir:—I have the honor to submit the following report of the operations of this institution during the scholastic year ending June 30th, 1891. Its work has been conducted substantially in accordance with the principles indicated in the By-Laws, modified in such directions as further experience showed to be desirable.

The library of this institution contains many valuable books, used chiefly as supplementary reading and for reference.

The books have been classified, renumbered and catalogued for the convenience of the librarian, who reports the number intact.

ARBOR DAY.

According to the proclamation of Gov. Jackson Arbor Day was duly observed by the students of the Academy, who, with parents and friends, enjoyed an appropriate program arranged and carried out on this day, and the school yards and many of our streets bear evidence of the labor and care bestowed upon them on that bright spring day. The very fact that a greater interest will be felt hereafter in tree planting and tree culture will insure an increased desire on the part of teachers and students to furnish the public with a literary treat each recurring Arbor Day.

Written reviews are frequently held to promote exactness of thought, definiteness of conclusion, and cultivate the power of clear and concise expression. They are also, when wisely treated, great helps in creating an earnest and high moral tone in the school, and thus often become efficient aids in securing good discipline, upon which, in a great measure, the success of a teacher depends.

PHYSICAL TRAINING.

In these days of intellectual strain the necessity for good health and physical endurance can hardly be questioned. As the body is the dwelling of the mind, it should be developed and trained to do the best service possible. Provision should be made for the purchase of such simple apparatus as can be well and readily used. All this can be done at a small cost and without, in any way, interrupting the present order of exercises. The advantages that this instruction and physical training will bring to students and teachers in the development of the body and better health, will more than compensate for the required labor and expense.

Notwithstanding the difficulties that our public schools have had to encounter in the past, they have accomplished much good in giving the rudiments of an education to thousands, who without them would have grown up in ignorance to swell the already long list of illiterates that are a blot on the fair name of the State. Many who have received in these public schools all the instructions that they ever received or will ever receive, will grow up to noble manhood and lovely womanhood to honor the State

and to bless their race, indebted to our public school system for all the good they accomplish in the world.

Three of the four lady graduates received teachers' certificates and are now teaching in the county; the other graduate has returned to take the post graduate course.

Concerning one of the post graduates, Mr. Edward H. Griffin, Johns Hopkins University, writes: In reply to your inquiry about the examination passed for admission to the University by Mr. H. A. Whittaker, I would say that our records show that he was successful in meeting our requirements, without conditions, in the following subjects: Arithmetic, algebra, plane geometry, mechanics, Cæsar, English, history, science.

CHARLOTTE HALL SCHOOL, St. Mary's County,—R. W. Silvester, Principal.

My Dear Sir:—The usual general report I have forwarded to you. Charlotte Hall school history is so well known by the people of the State as scarcely to need a repetition of the leading facts even. Suffice it to say that it is going forward in the work it has set itself to do in a successful manner. It now has all the appointments of a well regulated intermediate school. A Laboratory, Gymnasium and Reading room are recent additions to the appointments of the school. The courses taught and the proficiency of the instruction therein have successfully qualified many young men to fill many of the most prominent walks of life, and be able to enter, with credit to themselves, our leading institutions of learning.

A liberal English education is what is sought, together with a proficiency in the classic and modern languages.

The military feature is a prominent part of the school. It inculcates promptness in obedience and the importance of punctuality in all undertakings. Any further particulars will be cheerfully given.

MILLINGTON ACADEMY, Kent County—Henry Tonkin, Principal.

Dear Sir:—In compliance with your request that I furnish you with a "supplementary report of the condition, work and prospects" of the school under my charge, I cheerfully submit the following: Our enrollment, as yet, is not equal to that of the last school year, several of

the boys being yet at work on the farm or in the shop. The work done in our school will compare favorably, I think, with that of the schools of like grade in the county.

In our grades we adhere to the schedule furnished by the State Board of Education, and we aim to make the work thorough.

The teachers are progressive and experienced, two of them having been in the institution more than twenty consecutive years.

The prospect of the school depends materially upon our own population, and this, in an agricultural community like ours, is constantly changing, families moving to other localities and new ones taking their places, make from year to year some change in the school population. The total enrollment for the year ending June 30 was 135, with an average attendance of 80. The present enrollment is 101 with an average attendance of 75.

ST. JOHN'S LITERARY INSTITUTE, FREDERICK, MD.—J. F. X. COLEMAN, Principal.

Dear Sir:—In accordance with the rules of the State Board of Education I submit the following report of the studies and prospects of St. John's Literary Institute:

The patrons of the school have sufficient reason to be well satisfied with its present condition under the energetic administration of its master. The work in the school is being presented by him with breadth, thoroughness and vigor.

The laggards—and there must be some—are very few, indeed. A fine enthusiasm and a spirit yearning for the conquest of truth is the general rule.

The work of the school is carefully graded and consists of the primary, grammar and advanced classes. The two former classes pursue the usual studies of the primary and grammar schools. The advanced class has begun the study of Greek, and in Latin has read Roman History and Historia Sacra. Arithmetic and U. S. History will also have been completed.

During the second term this class will pursue the following studies:—Algebra, Bible History, Ancient History, (Rome), Greek Grammar, English Literature, Nepos and Phaedrus, Physiology. Temperance instruction in connection with the study of Physiology and Hygiene has been introduced into all grades of the school.

Oral instruction is given in three grades, and all pupils will be examined in these branches as in every other.

Compositions are required from every member of the two upper classes once every week, and letters are received from members of the school once every month.

The pupils have received the introduction of vocal music into the school with every indication of pleasure and delight.

The prospects of the school are indeed flattering. Opening on September 8th with twenty pupils, the attendance has constantly increased till now forty-seven names appear on the register.

WEST NOTTINGHAM ACADEMY, CECIL CO.—JOHN G. CONNER, Principal.

West Nottingham Academy has its usual number of students—about forty. During the summer vacation the buildings were renovated and repainted, outside and in, and the grounds cared for, giving everything a neat and tasteful appearance.

A small steam engine, a galvanic battery, and a new supply of chemicals and chemical glassware have been added to the physical outfit.

The work now being done by the students is of a high grade. More students are preparing for college and university than for some years past. The demand for State scholarship is also much greater than for some time past. There were twelve applications for the one vacancy existing at the beginning of the present school year.

Three years ago the trustees adopted three regular courses of study, Classical, Latin Scientific, and English, each requiring three years. One student graduated in 1890, and two in 1891. The present senior class consists of seven members. The branches of study now pursued, in addition to the common branches, are Latin, Greek, French, German, Algebra, Geometry (Seniors have Trigonometry and surveying in the spring), Physics, Chemistry, Civil Government and Rhetoric. Typewriting and shorthand are also taught.

The order among the students has been excellent. There has been no occasion for severe discipline. The moral sentiment among them is gratifying. The use of tobacco seems to be a minimum.

Nottingham's great need is a suitable dormitory. With her excellent site, her old history, and her good reputation, with the proper equipment she could easily rank among the first preparatory schools of the country.

FREDERICK COLLEGE, FREDERICK CITY.—LUCIAN S. TILTON, President.

Dear Sir:—The number of boys in attendance at Frederick College, Frederick, Md., for the fall of 1891 has already been formally reported to you, but in the following fuller report it will be necessary to repeat part of the information previously given. This report embraces the calendar year of 1891. In this school, which is nominally a college with full powers from the State to confer degrees, only elementary and secondary work is done, and no attempt or pretense to collegiate work is thought of. We have three departments or courses, which are in their conduct so elastic that a pupil may be pursuing studies in two of them at the same time. This enables a lad who may be well advanced in one or more studies to advance without being retarded by his lack of knowledge of another. The three departments are the Classical, the Higher English, the Elementary.

It has been the custom heretofore after completing the Elementary course, to enter the Higher English and remain two years, and at the end of this time to enter the Classical or continue with his English. An endeavor is, however, now being made to dip down and have the boys who are to take a Classical course at all begin immediately upon leaving the Elementary Department. The full Classical course when thus begun occupies five years at the end of which time a boy can readily enter Johns Hopkins University. The only modern language taught is Elementary German and but five scholars have taken it this year. This may be taken as an additional study in the Classical Department, but is not considered as a substitute for any other. The same is true of Greek. Neither are compulsory. Much attention is now given to English in all the courses and more is to be required. This branch is to be a requisite in every year of the school life. Hawthorne's Biographies and Tanglewood's Tales, Longfellow's Evangeline, Macaulay's Lays and Essay on Lord Clive, Scott's Lady of the Lake, and Shakespeare's Coriolanus have been read in the class room during 1891, and the birthdays of Irving, Longfellow and Whittier have been duly celebrated. Of the

Natural Sciences, Physiology is taught in the Elementary Course, and Primers of Physics and Chemistry are taken up in the other two. Not enough time is given to any of these, but we can see our way to nothing more at present. Like all schools within my knowledge we still devote too much time to Arithmetic to the exclusion of other *more practical* and *important* studies. All changes in this respect must be gradual owing to the popular prejudice.

Drawing is a part of our schedule for 1891–92, but owing to force of circumstances we have not yet been able to begin work upon it. I confidently look forward to the time when it will be required of every boy in the school.

Of the twenty-six who will be in the Classical Department on January 4th, eighteen will complete a collegiate course, while three will cease attending my school in June, 1892. Our school-year covers thirty-eight weeks of solid work.

This school, in accordance with its charter, receives from the State $800 annually, and in return therefor, we are educating fourteen boys, though the charter requires that eight be the number. Nor is the money misapplied. These boys are not wasting the money thus spent upon them. By action of the Board of visitors they are required to be first in punctuality, obedience and diligence. The Legislature might with great benefit to the State, grant such schools as Frederick College, which so capitally supplement the excellent work of the public schools, a lump sum as the foundation of endowments, or else establish a system in some respects similar to that now in vogue in New York. I beg leave to call your attention to this latter plan with which you are so familiar, and respectfully ask whether in your communication to the Legislature you cannot consistently embody some such suggestion.

ST. JOHN'S COLLEGE, ANNAPOLIS, MD. — DR. THOMAS FELL, President.

The general condition of St. John's College is very satisfactory. The buildings and grounds are in excellent order. A large and commodious gymnasium has been erected and fitted up with a full equipment of modern appliances. The chapel in McDowell Hall also has been renovated, re-painted and re-furnished, the necessary money having been provided by donations from the alumni.

The number of students in attendance continues steadily to increase. The Preparatory School, attached to the College, is also attracting a large number of boys from Baltimore and several of the Southern States.

By a liberal introduction of elective studies during the Junior and Senior years, an opportunity has been offered whereby a student can begin work in special lines before proceeding to the University.

Additions have been made to the Department of Physics and Biology, by means of which the students are enabled to pursue an advanced course of instruction in these branches, as well as in the one previously established in Chemistry.

Other improvements have been made in various directions, whereby the educational power of the college has been maintained in the highest rank. In order to strengthen the college, the alumni and friends are making subscriptions to an endowment fund, the income from which will be used for increasing the salaries of the professors. President Fell has been very active in obtaining subscriptions to this fund, and has met with a very gratifying response to his appeal from residents of New York, Boston, and other Northern cities.

WASHINGTON COLLEGE, CHESTERTOWN, KENT CO., MD.—DR. C. W. REID, President.

During the year ending June, 1891, free tuition, board, books, and room-rent were furnished to fifteen students from the Eastern Shore, and free tuition to five young men from Chestertown.

Seventy-nine students were enrolled from September, 1890, to June, 1891. The college opened in September, 1891, with eighty-five in attendance.

A scientific course, extending through the four years was established in the fall of 1890, in addition to the time-honored classical course. The body of College students is about equally divided between these two departments.

Arrangements have just been completed by means of which the college buildings, as well as the residences of the professors are supplied with pure spring water.

Co-education was adopted at the beginning of the present year. Eleven young ladies at once embraced the opportunity for obtaining a higher education.

A co-operative boarding club was also organized at the beginning of the fall term. Fourteen students are mem-

bers. The total expenses have thus far been less than two dollars per week. A student can now spend a year at Washington College at an outlay of $125 in the preparatory department and $135 in the higher classes.

Arbor Day was observed by all the schools of the State by appropriate exercises, literary and musical, and the planting of trees, shrubs, vines and flowers, in accordance with the following:

PROCLAMATION BY THE GOVERNOR.

STATE OF MARYLAND,
Executive Department.

As requ red by joint resolution, number seven, of the General Assembly of 1884, I do hereby designate Wednesday, the eight day of April next, as Arbor Day, and recommend that it be observed by the people of the State, in conformity with the resolutions, in planting trees, shrubs and vines; in the promotion of forest growth and culture; in the adornment of public and private grounds and ways, and in such other manner as may be in harmony with the character of the day so set apart.

While the day is not a legal holiday, I hope the authorities will cause it to be observed in all the public schools, and teach an important lesson to the children in our State.

Given under my hand and the Great Seal of Maryland, at the city of Annapolis, on the 16th day of March, A. D., 1891.

THE GREAT SEAL

By the Governor,
ELIHU E. JACKSON.

E. W. LECOMPTE,
Secretary of State.

The following circular was sent to the Examiners of each county:

To the Examiner of —— County.

DEAR SIR:—I mail to you to-day ten copies of "Arbor Day Leaves," by Hon. H. H. Egleston, of the Department of Agriculture, kindly presented to the State by the American Book Company, which were received by me yesterday.

The proclamation of the Governor, a copy of which is enclosed, refers to joint Resolution No. 7, of the General Assembly of 1884, page 753, Laws of 1884, establishing Arbor Day in Maryland.

I respectfully recommend that the Governor's proclamation and said joint resolution be read at each school celebration of Arbor Day.

Would it not be well to organize at each school house a permanent tree planting association, including the trustees, teachers, pupils and patrons, to foster a love of trees, shrubbery and flowers, and for the adornment of school grounds and village or neighborhood.

Washington City is becoming the pride of Americans as the most beautiful city in the world, largely because the systematic planting of trees throughout the city and of shrubbery and flowers in its reservations.

Druid Hill Park in Baltimore, the loveliest in the United States, is the delig t and pride of every citizen.

London has several thousand acres of parks. No city, town or village can be beautiful without abundance of shade trees.

In some parts of Germany the government makes it a duty for every landholder to plant trees in the highways before his property, and in a few towns no young bachelor can take a wife till he has planted a tree.

The public schools by organization at small expense, can within a few years add greatly to the beauty and attractiveness of our State. The Arbor Day festival may be the occasion of an annual review of what has been done, and of planting for the coming year.

With best wishes for a happy and inspiring Arbor Day, I am

Very respectfully yours,

E. B. PRETTYMAN.

Associations.

The State Teachers' Association, Professor John A. McCahan, President, and Professor A. F. Wilkerson, Secretary, held its annual meeting at Ocean City, Worcester County, in July.

The attendance was large, the officers fulfilled their respective duties with dignity, courtesy and ability. The arrangements of the Executive Committee, Professor James A. Diffenbaugh, Chairman, were excellent, and its members indefatigable in anticipating every possible desire of their guests.

The address of welcome was eloquent, the papers read, and addresses made, were able and interesting, and the discussions sparkling and earnest. Many distinguished gentlemen and charming ladies were in attendance, as visitors, and evinced great interests in the proceedings of the Association. The selection of the place of meeting was most happy, and, in the recesses, the peerless beach and surf irresistably wooed all into, or to, the sounding sea.

One outcome of the meeting was the appointment of a committee to memorialize the General Assembly to add the Returned War Tax to the State School Fund

The Association of School Commissioners of Maryland held its annual meeting in Baltimore, in November, with Rev. John Squier, President, in the chair, and Thomas Perry, Esq., Secretary.

The following was the program :

PROGRAM.

1.—REPORT OF COMMITTEE ON "THE COUNTY INSTITUTE."

GENERAL DISCUSSION BY THE ASSOCIATION.

2.—MARYLAND'S EDUCATIONAL EXHIBIT IN THE COLUMBIAN EXPOSITION.

DISCUSSION:

ALEXANDER CHAPLAIN, Examiner, ... EASTON.
JOHN E. McCAHAN, Assistant Superintendent, ... BALTIMORE.
GEO. W. SMITH JR., Commissioner, ... HAGERSTOWN.
DR. J. A. HOLTON, " . . . . . CENTREVILLE.
I. S. WILSON, " . . . . . UPPER MARLBORO.

GENERAL DISCUSSION BY THE ASSOCIATION.

3.—PAPER—THE RETURNED WAR TAX—Should its annual revenue be appropriated to the support of School Libraries.

WM. E. MANNAKEE, Commissioner, ... MONTGOMERY COUNTY.

DISCUSSION:

M. B. STEVENS, Examiner, ... DENTON.
H. G. WEIMER, " . . . . . CUMBERLAND.
CHAS. B. ROGERS, " . . . . . TOWSON.

GENERAL DISCUSSION BY THE ASSOCIATION.

4.—PROPOSED AMENDMENTS TO THE SCHOOL LAW.

DR. J. L. BRYANN, Examiner, ... CAMBRIDGE.

GENERAL DISCUSSION BY THE ASSOCIATION.

The following Subjects will come before the Association for General Discussion, if practicable:

1.—SHOULD THE NORMAL SCHOOL BUILDING BE ENLARGED AND PROVISION BE MADE FOR ADDITIONAL FREE SCHOLARSHIPS IN THE STATE NORMAL SCHOOL?

2.—CONDITION AND NEEDS OF OUR PUBLIC SCHOOL SYSTEM.

JAMES L. BRYAN,
JOHN T. HOLLAND,
W. D. HOYE.
COMMITTEE.

The following paper was read by William E. Mannakee, Esq., and on motion the author was requested to furnish a copy for publication in the Maryland School Report :

The Returned War Tax—How Should Its Revenue be Applied.

It should be the desire of all connected with the Public Schools that appropriations, or donations, should be expended—

First. To supply the deficiency existing in any branch of education that is neglected because of insufficient funds.

Second. It should be so distributed as to insure the enjoyments of its benefits to the greatest number deficient.

If the correctness of the above principles be admitted they should guide us in discussing "What disposition of the revenue from the Returned War Tax should be recommended to the General Assembly."

The amount of the direct tax levied, in 1861, was $371,299.83, which will be returned to the State by act of Congress, 1891. My judgment is that this Association should advocate its application to the support of the Public School Libraries.

Never before, in the history of our country, have appropriations for Public Schools been so liberal, or such large donations been made for higher education. So universal is the appreciation of its importance that the cause of education receives a share of the savings of the eccentric miser, as well as the consideration of the more fortunate accumulator of wealth.

It would seem that every deficiency had been provided for, but to a careful observer, it is apparent that there has been great neglect in providing information of the character requisite to development of higher citizenship. Especially is this true of the rural districts where there is no access to libraries, lectures or other influences necessary to mental growth or fuller development of character.

Our Public Schools afford the principles of education to thousands of needy ones, but the great end is lost sight of or was never seen. Further development ceases, and information of great importance to every citizen is shut out from them, hence, the percentage of those *poorly* qualified to discharge the duties of citizenship intelligently is large, while that of illiteracy is small, and for this reason criminality does not decrease as our so-called education of the people increases.

Good books open to us a higher kingdom. The recognition of these facts induced Messrs. Pratt and Carnegie to make magnificent donations for the support of Free Libraries.

Nearly all towns and cities have Free Libraries maintained in various ways at considerable expense. Why should not an effort be made to extend them beyond the city limits? Why should not their beneficial influences be extended as far as possible to every school district in the State? Why (if such a deficiency exists in this branch of education) should not this meeting make an effort to supply it from this fund?

Such liberal provision has been made for academies and colleges, in Maryland, that few will advocate their assistance from this fund.

Our schools are supported by a dual appropiation. The State tax is so levied as to require the rich counties, and Baltimore City, to aid the poorer counties provided they aid themselves. This some of them do reluctantly, judging from the short school year. The levies in the counties vary as much as the teacher's salary and length of school year. Our observation justifies the conclusion that additional revenue from the State does not affect either. The increase in the receipts from the State in the past two years has not increased the salary of teachers or lenghened the school year in most of the counties.

The average farmer complains so bitterly of high taxes that every opportunity to keep them down is taken.

In the face of this how can we effect an enlargement of the State School Fund to benefit either teachers or scholars? Let the recommendation be made with some degree of certainty as to its beneficial expenditure as well as for that branch of education most neglected.

If district libraries are to become general, some provision must be made for their support other than now exists. I have looked forward patiently, and hopefully to the time when a fund would be available for this very important and deserving object.

Environment, the master influence, plays ceaselessly upon our lives. If we are placed in contact with such external forces as schools, libraries, music and scenery, their influence must effect our mind, character and life.

The actual school days of many distinguished Americans have ended when they had hardly attained the proficiency necessary to admit them to the seventh grade, as schools are graded in Washington City, or, perhaps, I would better say, when they had but attained the rudiments of an education.

Whatever literary attainment, or mental development occurred beyond that was due to the reading of useful books.

Small sums employed annually upon such works in every school district will exert a very good influence upon our future men and women which will amply repay for the small outlay.

Books upon government, morality, ethical culture, were never so plentiful and cheap as now. The necessity of disseminating this character of literature was never so important. One of the illustrious founders of our Republic uttered his profound convictions upon this subject in three words: "We must educate."

If I thought there was a more deserving cause I would cheerfully commend it for consideration.

From a committee appointed at the meeting of the Association in 1890, to outline a plan of work for County Institutes, and report at this meeting, two reports were presented as follows:

The committee on "County Institutes," beg leave to submit the following:

Report.

Your committee is instructed by this Association "to take into consideration the advisability of outlining some plan of work for County Institutes."

It is no part of our duty to consider, or report upon, the importance of holding County Institutes. The elaborate discussion of that phrase of the subject, at the last meeting of this Association, the well known opinions of leading educators, established custom, and the consensus of opinion among the school officers of this State, render such discussion unnecessary. It is assumed that this Association deems wise the law which provides that "A Teachers' Institute, to continue five days, shall be held in each County once a year." Sec. 80 of Art. 77, of The Maryland Code.

We are charged

1st,—To consider whether it is advisable to adopt some plan of work for the County Institutes; and if that question be decided affirmatively—

2nd,—To outline some plan of work for County Institutes, for the consideration of this Association.

That some systematic plan should be adopted and pursued in the work under consideration, cannot be doubted, as the most valuable results are unattainable in any form of effort, without well considered organization of forces, and definite and thoughtful adaptation of means to the desired ends.

Spasmodic and designless attempts are necessarily fruitless.

To "outline a plan" worthy of your consideration, is recognized as a delicate and difficult undertaking. It is evident that such a plan should be adaptable to our system of School Laws, or, at any rate, to such modification thereof as we may reasonably expect the General Assembly to make, at the instance of so representative a body as this Association. It should not be procrustian, but sufficiently elastic to be adjustable to the special needs of every County. It should be comprehensive and progressive, so that the work done one year shall be based upon that of the preceding year, and each year's work be a part of a definite course.

It should require preparation for each Institute, by teachers and school officers. It should be practicable and economical.

The teachings of experience in and beyond our State should be considered in devising the plan.

The endeavor to formulate a plan for conducting Institutes, necessitates an examination of the existing provisions of Maryland School Laws and By-Laws bearing upon the subject. We find from such examination, that Institutes are designed as temporary Normal Schools; that one shall be held in each County once a year, to continue five days; that all teachers shall attend, when ordered by the proper authority; that the officers charged with arranging and conducting Institutes are the Members of the Boards of County School Commissioners, the Examiners, and the Principal and Professors of the State Normal School.

Such being the law, the facts are, that in the majority of Counties, Institutes have not been held for some years past; during the last year only five have been held; in the other Counties, Teachers' Associations held, usually at the close of each term, seem to have been substituted for Institutes.

We believe that the officers before mentioned are not derelict, but that the failure to hold Institutes is due chiefly to three causes, viz: The want of money; the want of time, free from other imperative and engrossing official duties; and the absence of any definite plan whereby the

interest of teachers can be maintained, by reasonable expectation of benefit from attendance.

In other States much money is expended in providing lecturers, or in salaries of officers whose special function it is to conduct Institutes.

It may be well to consider, in our search for a plan, two features of our School law peculiar to Maryland, viz: the quasi Legislative authority of the State Board of Education; and the intimate official connection of the State Normal School with the whole System of Public Instruction. The former has been recently exercised, first, by ordering that "Examinations for Teachers' Life Certificates shall embrace all branches included in the curriculum of the State Normal School;" and then, by enacting by-laws which provide for an Annual Examination for said purpose, to continue three days, in which the Faculty of the State Normal School aids the Board.

Provision has thus been made whereby any industrious teacher may win the highest Certificate of professional proficiency, and that without any additional cost to the State, except what may be required for a few extra meetings of the State Board, whereas, in other States, the same service involves large expense.

It is respectfully suggested that the desired plan of work for County Institutes may be found, in part at least, by the adoption of the curriculum of the State Normal School as that of County Institutes. This might be supplemented by a more extended course in pedagogy, science and literature for advanced teachers. It would be easy and natural to grade each Institute according to the capacity and attainments of the members.

It may be admitted, that the highest efficiency of the plan suggested, would require some addition to the corps of school officers.

It is believed that provision for the appointment of one Institute Conductor would make our School System as complete as that of any State. Such officer would be the connecting link between the State Education Department and the County School Boards.

The Examiner of each County, knowing best the needs of his schools in consultation with the Institute Conductor and the Principal of the State Normal School, could adapt the general plan to his locality, and these officers in harmonious action should be able to make every County Institute what the law evidently contemplated. Every teacher would be inspired by the prospect of advancement

in his profession, and the Institute would test attainments and incite to renewed exertion.

It is respectfully affirmed that these suggestions are practicable and economical, as experience has demonstrated the former, and a comparison with other Systems would show that the salary of one officer would add to the instructing corps already available, what is obtained in other States at vastly higher cost.

Our twenty-three Counties would give ample occupation to the most industrious Conductor, and yet one Institute Conductor would be enough for our comparatively small State.

It is therefore respectfully suggested that this Association instruct a Legislative Committee, to be appointed, to endeavor to obtain such modifications and additions to the laws and by-laws as may be found necessary to make effective the outline of work for County Institutes presented in this report.

All of which is respectfully submitted.

E. B. PRETTYMAN.

To the Association of School Commissioners of Maryland:

Your Committee appointed at your annual meeting in the month of November, 1890, to prepare a report on County Institutes, to be submitted to the next meeting of your Association, have considered the subject and present the following:

There are so many lines upon which a report on County Institutes might direct inquiry, that we deem it best to confine our report to a few points of discussion, and then to make a few practical suggestions.

We have reasons for believing that in many counties of our State the Institute has been neglected as an agency provided by law for the professional growth of our teachers and the improvement of our public schools. Its capabilities as an instrumentality for good is far from being fully appreciated, we fear. We use the word capabilities in connection with the subject, because, however much the Institute has done for the cause of education, even in the counties that have used endeavors to obey the mandates of the law in regard to this matter, it has not borne its full or most perfect fruit.

Though we have, in an irregular, desultory, hit-or-miss sort of way, been holding Institutes in this or that county

for a quarter of a century, we do not seem to have advanced along any other line than that of the Teachers' Association and Reading Circle idea. The Teachers' Association and the Institute have been so confounded, that the former has been substituted, in some counties, as a full equivalent for the latter.

The Association idea is to appoint a few of the first grade teachers to prepare essays, and a large number, if not the whole body of teachers, are assigned to discuss a great number of selected topics relating to teaching, school government, etc. The time of the Institute is consumed by the reading of crudely prepared and pointless papers, and in the discussion of threadbare subjects by teachers who lack not only culture, but also proper knowledge of psychological laws, pedagogical principles, and methods of teaching. Lacking these, your teachers treat subjects in a very superficial manner, and rarely present anything that is of any practical worth or in any way valuable. The time of the Institute is, therefore, spent to but little purpose, and it fails utterly in being a place where teachers receive any really helpful "normal instruction."

We think that the Institute should be, during the whole five days, a real, live school, where teachers are required to work, and where they can receive "normal instruction" that will help forward the teaching in our schools along broad lines of artistic development.

In the State of New York, where faith in the Institute and Normal School is, perhaps, stronger than in any other State, the tendency seems to be to teach "methods" through lecturing, and not by work with the class. In many of the Western States, however, the tendency seems be be in the other direction, viz : to banish the prepared lecture, and to devote the whole time of the Institute to work with the class. The lecture may be, and usually is, the droning of the common-place pedagogue before a long-suffering audience ; but, on the other hand, the tendency of "method" is always towards pedantry. But there are really only two "methods" of teaching : the objective and subjective. What we usually understand by the term "methods," are only "devices." One of the objects of the Institute should be to teach an exact educational terminology. A loose terminology leads to loose thinking and begets misconception and confusion of ideas.

In the Institute work of our State, we would preserve both the lecture and class instruction for teachers. To confine the Institute to what, by the use of a loose terminology, are called "method lessons" and work with the

class, would be to narrow its influence and to curtail its benefits for the teachers. There should be one, or perhaps two good lectures every day. These lectures, following the Herbartian School of Educational Philosophy, should be upon the following three branches: Government, Instruction and discipline, discussed from the true Herbartian psychological standpoint, and giving to the teachers a more profound conception of child nature, a higher sense of personal responsibility, and a broader view of the whole range of human culture and character. The lecturer should be, of course a good full man, thoroughly imbued with professional spirit, and one who has devoted his life and best thought to the study and practice of teaching. "Institute work," says Prof. Buckham, "is a peculiar work. Not every one who can write a lecture which may elicit notice in a local paper, not every good scholar, not every good teacher can give good instruction at an Institute. It requires something more than ability to talk—even to talk well—all the time; it requires something more than a few set lessons to be given from a note book; it requires a combination of qualities and a degree of experience to do the best work which not every honest and well-meaning man possesses."

We have a most excellent school law, and it should be so administered as to gradually make our system and school work as uniform as possible throughout the State. There is too much isolation by counties; and the tendency in our system, so far as the work in our schools is concerned, is to wander farther and farther away from State uniformity. Who of us would not assist in any endeavor that promises to unify the work in the public schools of our State? It can only be done through the best and most thorough performances in the Teachers's Institute. To unify the work in the public schools of our State means, then, to first unify the work of our Institutes. For this, as well as other purposes, we need and should have a State Superintendent of Public Instruction, not the least part of whose duty it would be to organize, and with the aid of the County Examiner, conduct Institutes each year in every county of the State.

In conclusion, your committee would present to the Association the following resolution:

RESOLVED, That a committee of three be appointed to prepare and present to the Legislature an amendment to the school law providing for the appointment of a State Superintendent of Public Instruction and defining his duties, etc.

Respectfully submitted.

ALEXANDER CHAPLAIN.

The reports were discussed, but no final action thereon was taken by the Association.

The following Committee was appointed to present to the Legislature such change in the School Law as the Association may adopt: James A. Diffenbaugh, John C. Bannon, Louis L. Beatty, Robert Shriver and George Biddle.

After discussion, several changes in the School Law, offered by Dr. James L. Bryan, were approved and others rejected.

Condition and Needs of the Public School System.

I have had the pleasure, during the last year, of attending five County institutes, many Teachers' County Associations, the exercises at the laying of the corner stone of a commodious, tasteful and substantial High School building, and the commencements of several High Schools and Academies, and also the commencements of the Western Maryland College and of the Maryland Agricultural College. I have thus visited officially all but three of the counties of the State, and am deeply indebted for thoughtful courtesies and generous hospitality invariably extended by school officers, teachers and citizens. From observation and intercourse, and from the reports of the Boards of County School Commissioners and examiners, I am convinced that the Public School System of the State is admirably administered by school officers and teachers, and that the public are deeply interested in the schools. There is a strong and growing sentiment in favor of an increase of the State School Tax.

The chief difficulties of the school officers arise from lack of funds, and it has been cause of continual surprise to learn how much excellent work is done, and how much improvement is made in buildings and appliances, with the means available.

Well informed and thoughtful gentlemen in some of the counties aver that the limit of county taxation for school purposes has been about reached.

The most important needs of the public schools are (1) free text books, (2) school libraries, and (3) Teachers' Institutes in all the counties.

FREE BOOKS.

It is so obvious that every reason for the support of free schools by the State, applies to the furnishing of text books free of cost to the pupils, and that the teachers' work is continually embarassed, and the attendance upon school lessened by want of free text books, that the absence of provision therefor is a strange fact. A study of the valuable and exhaustive chapter (XIX) on "State Text Books, Laws and Systems" in the last published report of the U. S. Commissioners of Education is very instructive.

The history of endeavors to furnish free text books in every State is given, and two facts stand out as the teaching of experience. First, that the chief, if not the sole, cause of failure has arisen from schemes to furnish text books by State contracts, and it is asserted that "no scheme of State contract has ever prevailed continuously in any given State without giving rise to scandals, abuse and discontent."

Second, that in only five States does the law require the use of text books to be furnished free to all pupils, viz: in Maine, New Hamshire, Massachusetts, Delaware and Nebraska; and that in each, local boards (town or district) contract with dealers or publishers. This system is confidently claimed to be the only solution of the whole problem.

If, therefore, the General Assembly will add two cents on the one hundred dollars to the State School Tax and require the use of text books to be furnished free to all pupils, the problem will be solved for Maryland, as the Boards of County School Commissioners are already authorized by law to select, and contract for text books.

SCHOOL LIBRARIES.

The General Assembly, in the School Law, has already provided that, "For the further encouragement of education, district libraries ought to be established in each schoolhouse district."

But the situation which confronts the School Commissioners is that money expended for libraries, diminishes the amount at their disposal for payment of teachers' salaries. Increase that amount and the libraries will be established.

TEACHERS' INSTITUTES.

Wherever Institutes are held, they are of incalcuable value for instruction and inspiration to the teachers, and for exciting public interest in the schools. The law provides for them, but lack of means is the chief reason why more are not held.

These suggestions are respectfully submitted for the consideration of the General Assembly. The State of Pennsylvania last year, increased its annual appropriation from two millions to five millions of dollars. All the Southern States are progressing in the support of public education. May we not hope that Maryland will respond to the earnest and repeated request of school officers for an enlarged appropriation?

E. B. PRETTYMAN,
Secretary.

REPORTS

OF THE

SCHOOL COMMISSIONERS

OF THE

COUNTIES.

ALLEGANY COUNTY.

HON. E. B. PRETTYMAN,

Dear Sir:—The annual report relating to the public schools of Allegany County is herewith transmitted for your consideration.

It affords me pleasure to state that the enrollment of pupils and the average attendance of the same show a marked increase over that of the previous year. This may be attributed to various causes, but to the earnest labor of our teachers and to the growing appreciation by parents of the educational advantages now offered, a great part of the credit must be given.

In my judgment our teachers will compare most favorably with those of any other county of the State. As a rule, they are the living exponents of our public school system, the majority of them having received their training in our home schools. In my regular visits I have the opportunity to see and criticise the kind of work attempted, the different methods introduced and practiced, as well as the general tenor of the school, all of which contribute very materially in making a fair and impartial estimate of what constitute skillful and successful teaching.

An eager desire to improve is manifested by a number of our teachers, and great interest is shown in the work of the Reading Circles and local associations, several of which have been organized in our county. In addition to the questions and topics discussed at these weekly or monthly meetings (as the case may be) by those who are favorably situated to attend, considerable private reading of educational journals, and standard works on methods of teaching and the history of education is also done. There seems to be a growing tendency on the part of our teachers toward mental improvement, and the little school of the rural district is keeping pace in this direction with that of the more highly favored of the town or city. Schools under the guidance of teachers thoroughly awake to the duties and responsibilities resting upon them, and filled with an earnestness and an enthusiasm to draw out, cultivate, strengthen and develop the different faculties of their pupils must stand as lasting monuments on the great highway of educational progress and reform. Encouragement and commendation are certainly due such teachers, and whenever and wherever it is possible for me to meet with them, I consider it a great pleasure to do so, and to exert every effort toward the advancement of both teachers and pupils.

When the community, the state, and the nation, will have been brought to a full realization of the great importance of public school education, then, and only then, will the vast army of men and women engaged in this mighty work stand on the high plane to which they are justly entitled, and receive the respect and free remuneration that the profession of teaching most surely merits.

Very respectfully,

H. G. WEIMER, *Examiner.*

ROBERT SHRIVER, *President.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1890.
Number of School houses owned by the County, 91; rented 4; Total, 95	95	93
Number of rooms occupied when the attendance is largest	154	152
Number of male teachers (principles) white, 29; colored, 1; total, 30	30	28
Number of female teachers (principles) white, 65; colored, 3; Total, 68	68	65
Number of male teachers (assistants) white, 2; total, 2	2	2
Number of female teachers (assistants) white, 77; colored 1; Total, 78	78	70
Total, white, 173; colored, 5; Total, 178	178	165
Number of fenced lots	32	31
Number of schools having outbuildings	93	92
Number of schools having sufficient blackboards	91	89
Number of schools having good furniture	92	85
Number of terms schools were open—white, 3½, colored, 3½		
Number of different pupils for the year—white, 8,339; colored, 244; total, 8,583	8,583	8,357
Number of Pupils in average attendance, total, 4,906		
Number of official school visits paid by examiner	208

CALVERT COUNTY.

Reference to our last report will show a small increase in the number of pupils in attendance for the last scholastic year, and a much larger average than that for the year ending July 31, 1890. Until the winter term, the colored teachers had been paid a certain salary without regard to the average daily attendance of pupils. As all of the colored school districts are large, and the average of many of the schools for the full term was very small, the Board adopted the plan of regulating the salary by the average attendance—the same as has been applied to white schools for a number of years. The result was that for the three succeeding terms, the average was double that of the fall term, being evidence of increased interests of teachers and patrons to secure a more regular attendance.

By strict economy in the management of the school funds, the Board has been able not only to pay in full all claims as presented, but also to accumulate a considerable surplus, as shown in the account of disbursements. At the close of the fiscal year ending July 31st, 1890, a balance of over six hundred dollars was due from district tax-collectors, and this sum, in addition to the amount collected of the school levy for 1890, makes the county receipts larger than may be generally expected for any succeeding year. In this connection we would refer to the result of the act passed by the last legislature providing for the collection of our taxes by a County Treasurer, instead of district collectors, as being highly satisfactory in promptness of the payment of the County school-tax. Last year balances were due from collectors for amounts placed in their hands for collection three or four years before, and in one or two instances for a longer time. As a rule, the amount of the school fund is not greater (how rarely more) than that actually needed for school purposes, and any delay or shortage in its payment must necessarily result in great inconvenience, if not serious injury, to educational interests.

It was stated in our last report that, owing to the irregular formation of our county, caused by the creek tributaries of the Patuxent River, two branch schools had been opened for the accommodation of pupils remote from the schools of their school districts. One of these situated near Broome's Island, has been established as an independent school, and has become one of the largest in the county.

Since the close of the fiscal year, one new school-house has been built, costing, including furniture, etc., nearly $400.00 and another has been contracted for, to be completed by the end of the fall term, at an aggregate cost of about $500.00. Extensive repairs have been made to some of the school houses, incidental bills have been paid, and coal provided for such schools as are so situated that wood cannot be procured for fuel. Owing to the opening of two branch schools, the additional expense of fuel, books, etc., and the subsequent establishment of one of them as a separate school, as has been mentioned, and also a greater number of first grade teachers receiving a larger salary, the current expenses last year were about seven hundred dollars greater than for any previous year. This amount, and also that of the annual cost of another school, opened since September 1st, will be a certain quantity in the account of disbursements for each succeeding year.

We heartily endorse the suggestion of Prof. E. B. Prettyman in his Annual Report that the State school-tax be increased to at least 12 cents on the $100 of assessable property in the State. The meager salary, scarcely equal to

servants' wages, now received by teachers in some counties, where the local tax is already burdensome, is little less than a *shame* upon the people of our commonwealth of which we are naturally proud. Apart from this, the steady increase in the number of schools and the consequent increase of contingent expenses, would seem to render the measure a necessity.

The very early date in July for the meeting of the State Teachers' Association prevented the members of the Board and many of our teachers from attending. It is quite impossible to adjust teachers' accounts and hold a meeting of the Board in less than five or six days after the close of the term, and depending upon the regular trips of steamboats to Baltimore, as we do, only those teachers who were prepared to start for the place of meeting immediately after the close of school could attend.

Arbor Day was observed in most of our schools, the exercises consisting of recitations, readings, singing and the planting of trees, shrubs, vines, etc. The majority of our school house lots are not inclosed, and the grounds being so exposed to straying stock, the results of the efforts of teachers and pupils to ornament and beautify the school premises are very discouraging. The inclosure of so many lots would be an expense that the Board is not just now prepared to incur, but we hope the difficulty may in time be overcome.

CHAS. C. BIRD.

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1890.
Number of School houses owned by the County, 39 ; rented 1 ; Total, 40, (frame 40)	40	40
Number of rooms occupied when the attendance is largest	42	40
Number of male teachers (principals) white, 8 ; colored, 3 ; Total, 15	15	13
Number of female teachers (principals) white, 17; colored, 9 ; Total	26	26
Number of female teachers (assistants) white, 3 ; colored, 1 ; Total	4	4
Total, white, 28 ; colored, 17 ; Total 45	45	43
Number of fenced lots	2	2
Number of schools having outbuildings	8	7
Number of schools having sufficient blackboards	40	40
Number of schools having good furniture	40	40
Number of term schools were open—white, 4; colored, 4	4	4
Number of different pupils for the year—males—white, 575 ; colored, 539; total, 1,114; females—white, 502 ; colored, 549 ; total, 1,051	2,165	2,099
Number of pupils in average attendance—white, 506 ; colored, 383 ; total, 889	889	872
Number of pupils over sixteen years of age—white, 41 ; colored, 57 ; total, 98	98	60
Number of official school visits paid by Examiner, (white, 75 ; colored, 48)	123	120

Other purposes—furniture	2 82	
Repairs	52 67	
		$2,473 96

CECIL COUNTY.

Dear Sir:—In transmitting to you the Annual Report of the Schools of Cecil County, we are glad to say that the schools have been open for nine months, and we think we have been doing good work in training the pupils for the business of life.

In the report the question is asked how many schools are supplied with sufficient blackboards. We have not put in any blackboards for over twelve years; we use slates only, as being far superior to any kind of blackboard.

Respectfully submitted,

J. SQUIER, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1890.
Number of schoolhouses owned by the County, 86; rented, 4; total, 90	90	
Frame, 73; brick, 11; stone, 2	90

KENT COUNTY.

PROF. E. B. PRETTYMAN:

You have herewith the school statistics of Kent County for the year ending July 31, 1891. During the year, five meetings of the County Teachers' Association were held, one of which the Principal of the Normal School attended.

The Examiner held, during the year, a meeting of the Trustees of schools in each election district. The school law was discussed and an effort made to arouse a greater interest in our school system.

Two comfortable houses, for colored pupils, have been built and supplied with modern school furniture.

EBEN F. PERKINS,
Secretary.

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1890.
Number of school houses owned by the County, 50; occupied, 14; total, 64	64	64
Frame, 61; brick, 3		
Number of rooms occupied when the attendance is largest	80	80

PRINCE GEORGE'S COUNTY.

PROF. E. B. PRETTYMAN.

DEAR SIR :—I herewith transmit the report of the public schools of Prince George's County for the fiscal year ending July 31, 1891.

Beg leave to state, in explanation of accompanying tables, that under heading, "cost of books," is given the amount of money expended by the county in books for poor children.

The school authorities here keep no books on hand. Each teacher orders for his school from a designated bookseller in Baltimore, sells to pupils at prices fixed by School Board and is charged with amount of his orders. Under heading, "School houses built and enlarged during the year," is given the actual cost, Financial tables show the amount of cash paid for building since August 1st, 1890.

Public sentiment of this County is favorable to public schools. County Commissioners levy liberally for their support.

The schools have been kept open for four terms each year from 1886 to 1890. Indeed, since the adoption of the present system, very little time has been lost.

During the past year the County has built and furnished, for use of white children, five school houses and has enlarged and repaired two old buildings. The heavy expense thus incurred necessitated the closing of the schools on 1st of June. The County is now well supplied with school houses and the schools are doing fairly good work.

School Commissioners have out on account of white school fund, one note of two thousand dollars. The cash balance credit this fund is over four thousand dollars. All of which is respectfully submitted.

W. W. DUVALL, *President.*
THOS. S. STONE, *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1890.
Number of school houses owned by the county, 76 ; rented, 1; Total : 76 ; frame, 75 ; brick, 1	76	74

ST. MARY'S COUNTY.

PROF. E. B. PRETTYMAN.

DEAR SIR:—I have the honor to herewith transmit my annual report for the year ending July 31st, 1891.

I have but little to submit beyond what is disclosed by the statistical part of the summary.

The enrollment exceeds that of the past year by about 9 per cent., and while I cannot but feel that a larger average attendance should have been recorded, it is gratifying to note that it is in excess of former years. The patrons of our schools are, to a large degree, aroused to a fuller appreciation of Public School advantages, and to the necessity of securing properly qualified teachers.

Of the balance to our credit ($4,542.55) $1,823.81 is to the credit of the white fund; $2,718.74 to the credit of the colored fund.

We have adhered strictly to the principle of running our schools on a cash basis. We do not owe a dollar, and never keep our teachers waiting for their pay a moment longer than suffices to examine their accounts and forward their checks.

Respectfully,

HENRY WINGATE. *Secretary.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1890.
Number of school houses owned by the County, 63; (all frame)	63	63
Number of rooms occupied when the attendance is largest.....	65	65

		$6,301 19

WASHINGTON COUNTY.

PROF. E. D. PRETTYMAN:

We have the honor to submit herewith the annual report of the public schools of Washington County for the school year ended July 31, 1891.

We show increase as follows: In school rooms, 2; teachers, 4; enrollment 310; average attendance 244.

It is a fact, worthy of note, perhaps, that the enrollment in almost all the towns of the county, except Hagerstown, if not at a stand still, is falling off, a fact attributable, we presume, to the admitted tendency of the rural population to gather into cities.

Four new houses have been built during the year to take the place of buildings which had become unfit for use.

We have nothing new to report in school work but think we may say that our schools generally are in a satisfactory condition and are receiving the support and patronage of all classes of our citizens.

Respectfully submitted,

P. A. WITMER.

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1990.
Number of school houses owned by the county 118; rented, 19; total	137	135
Frame, 48; brick, 66; log, 12; stone, 11.		
Number of rooms occupied when the attendance is largest	210	208
Number of male teachers (principals), white, 90; colored, 4, total	94	96
Number of female teachers (principals), white, 31; colored, 8; total	39	34
Number of male teachers (assistants), whites, 18; total	18	18
Number of female teachers (assistants), white, 59; colored, 2; total,	61	58
Total, white, 198; colored, 14	212	208
Number of fenced lots	28	28
Number of schools having outbuildings	137	135
Number of schools having sufficient blackboards	137	135
Number of schools having good furniture	135	133
Number of terms schools were open—white, 3; colored, 3.	3	3
Different pupils for the year, white, 8,328; colored, 500; total	8,829	8,719
Number of pupils in average attendance, white, 5,506; colored, 298; total,	5,804	5,560
Number of pupils over 16 years of age	560	526
Number of official school visits paid by examiner	162	203

NUMBER OF PUPILS.

		Fall Term.		Winter Term.		Spring Term.		Summer Term.

WICOMICO COUNTY.

PROF. E. B. PRETTYMAN :

In compliance with the law I submit herewith my Annual Report for the school year ending July 31, 1891, of the Public Schools of Wicomico County.

The Board has established during the present year three new schools, all of which were greatly needed as shown by our total enrollment which is two hundred greater than the previous year.

Our county is now fairly well supplied with school houses. It is, however, a lamentable fact that many of our best teachers are dropping out of the service. The salaries paid are too small to hold them.

Respectfully submitted,
THOS. PERRY, *Secretary of Board.*

SUMMARY OF SCHOOL STATISTICS.

FOR SCHOOL YEAR ENDING JULY 31, 1891.

	1891.	1890.
Number of school houses owned by the County, 71; rented, 6; total, 77; (frame, all)	77	74
Number of rooms occupied when the attendance is largest	88	85
Number of male teachers (principals) white, 23; colored, 12; total, 35	35	34
Number of female teachers (principals) white, 34; colored, 4; total, 38	38	38
Number of male teachers (assistants) white, 3 ; total, 3	3	2
Number of female teachers (assistants) white, 9; colored 3 ; Total, 12	12	11
Total, white, 69; colored, 19; total, 88	88	85
Number of fenced lots	9	9
Number of schools having outbuildings	31	27
Number of schools having sufficient blackboards	all	
Number of schools having good furniture	56	52
Number of terms schools were open—white, 3; colored, 3	3	3
Number of different pupils for the year—white, 3,555 colored, 1,128; total, 4,683	4,683	4,473
Number of pupils in average attendance—white, 1,881; colored, 485; total, 2,366	2,366	2,322
Number of pupils over 16 years of age—white, 100 ; colored, 61 ; total, 161	161	
Number of official school visits paid by Examiner	90	80
